

Name of the activity/Programme: Industrial visit organized by Department of Chemistry, BMSCE, Bangalore

Title: “Industrial visit to BIOCON”

Resource person: - NA

Date of activity: 21-02-2026 (10.00 am to 3.00 pm)

Number of faculty participating: 16

Number of research scholars participating: 02

About the event

The department of chemistry organized a industrial visit to BIOCON one of India’s leading biotechnology companies, as a part of the efforts to enhance industry exposure and practical knowledge among faculty members and research scholars.

The key objectives of the faculty industrial visit were:

- To understand large-scale biopharmaceutical manufacturing processes
- To gain exposure to industry-oriented research and development activities
- To familiarize faculty with Good Manufacturing Practices (GMP) and regulatory standards
- To bridge the gap between academic curriculum and industrial requirements
- To explore opportunities for collaborative research, training, and internships

The visit included:

- An introduction to faculty members on BIOCON’s organizational structure, operations and product portfolio through presentations and interactive sessions conducted by industry experts.
- Insights into upstream and downstream processing in biopharmaceutical production
- Discussion on quality assurance, quality control, and regulatory compliance
- Exposure to research and development facilities and current innovations
- Interaction with scientists and technical professionals on industry expectations from academia

Outcomes

- Enhanced practical understanding of industrial-scale bioprocesses
- Enabled faculty towards curriculum enrichment with real-time industry practices
- Helping faculty guide students more effectively toward industry readiness
- Strengthening industry–institute relationships
