

Report on one day industrial visit to Galore systems Pvt ltd

The Department of Electronics and Communication, BMSCE had organized a one day industrial visit to Galore systems Pvt ltd on 27th June 2025 between 10 am to 2.00pm. This visit was for PG Electronics and Digital Communication students of 2024 admitted students. In total PG 12 students attended the visit. The content related to multimedia communication subject was practically demonstrated during the visit. The Students were very enthusiastic and Responsive. This experiential learning aimed to link theory with practicality was well received.

Galore Systems is an Indian company that operates in several technology sectors

Animation, Visual Effects, and Gaming (AVGC): They offer motion capture hardware and software solutions to the AVGC industry.

Movement Sciences: They provide advanced motion analysis systems for various applications, including biomechanical analysis, ergonomics, injury prevention and rehabilitation, and high-performance coaching.

Augmented Reality (AR) and Virtual Reality (VR): They are involved in AR/VR hardware, software, and infrastructure development, specializing in creating immersive and interactive experiences.

Automation: They specialize in collaborative robots (cobots) solutions for various industries to enhance efficiency and productivity.

Prabhanjana Rao and his team demonstrated the various modern multimedia equipment features and working of the same. The session was interactive and coordinators thank galore systems for providing an opportunity to interact with our PG students. The inspiration derived was well worth the time spent.
