Industrial Visit to STELLAPPS TECHNOLOGIES PVT LTD AND ZSCALER

15th February, 2019

STELLAPPS TECHNOLOGIES PVT LTD which is basically an IoT based company. The company concentrated on the implementation of IoT in the field of agriculture mainly on Dairy Farming. They explained as where all their ideas have been implemented starting from the milking of cows till the plants where various dairy products are produced. They collect milk from farmers and check for the fat and SNF values, based on these values farmers were paid appropriately. The details about the milk like quality and quantity were sent on cloud so that total transparency could be maintained. We got to know the idea of IoT in those field and they asked us to improve on it.

ZSCALER Company, This company works on cloud computing and cloud security and basically a SaS(which provide services) oriented company. At an average they do 800,000 transactions per second. It is one of the leaders in secure web gate ways magic quadrant for almost 8 years overtaking cisco and other companies. We were informed about importance of cloud security and its application in future.
