

Department of Chemistry

Name of the activity/Programme: Invited Talk

Theme: Two Dimensional Materials for Energy Applications

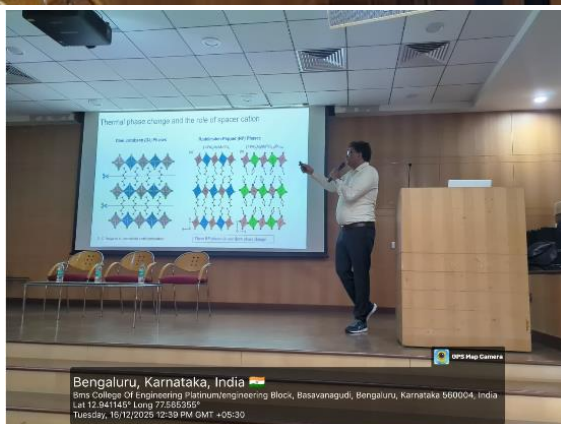

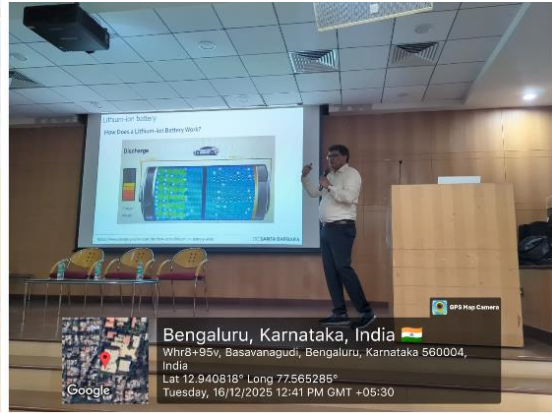

Date of activity: 16-12-2025

Number of teachers participating in such activities: 12

Number of students participating in such activities: 66

An invited talk was organised by the Department of Chemistry, B.M.S. College of Engineering on 16-12-2025. The talk was conducted in Auditorium 2, PJ block at 11:30 am. The speaker, Dr. Pratap Vishnoi, Assistant professor at JNCASR, delivered a talk on 'Two Dimensional Materials for Energy Applications'. While delivering the topic to the audience, specially, UG engineering students, the speaker addressed the basic concepts of 2D materials, their importance, simple methods of preparation and areas of engineering applications. He also introduced the students and faculties to the wide range applications of 2D nanomaterials and hybrid materials and their magnetic behaviour, followed by applications. The students showed immense curiosity and interest to know more about these materials and recent advancements in various fields of engineering. The faculties also gained certain insights for their research work. There was a lot of interaction between the speaker and the audience, exchange of ideas and knowledge; thus, the conduction of the talk was found really beneficial.
