Report on AIChE Jeopardy

Event	JeopardICE
Date	12 th May, 2026
Day	Tuesday
No. of attendees	30

American Institute of Chemical Engineers BMSCE Student Chapter conducted an icebreaker event titled “JeopardICE”. The students of 2nd and 3rd year of Department of Chemical Engineering actively participated in the event. The objective of this event was to welcome new students into the club and help them get acquainted with both their peers and the club.

There was a total of 30 students who attended the event. The event was coordinated by Umang Sultania and R Amirtha. The event followed the classic Jeopardy! format where six teams buzzed in to answer clues across categories of increasing point values, responding in the form of a question, with a fun chemical engineering twist. The questions were asked from several streams including chemistry, physics, mathematics, general knowledge and pop culture.

Alvin Jacob Santhosh, Sreenidhi Anand, Abhinav Navrathna from first year won the 1st prize and Keerthana Baliga, N. Kunguma Hrishitha, Chinmay K from second year won the 2nd prize. The winning groups were awarded gift hampers with goodies.

The event was concluded with a comprehensive introduction to the AIChE BMSCE Student Chapter. The closing session included an introduction of all core committee members to the first-year students, an overview of club activities, upcoming events, and opportunities for involvement, an introduction of faculty coordinators and their roles, and encouragement for first-year students to actively participate in club events.

It was a successful first event for the AIChE BMSCE Student Chapter this term, effectively breaking the ice between first year students and the club. The enthusiastic participation across all six teams made for a memorable introduction to the chapter.
