

# BMS COLLEGE OF ENGINEERING, BENGALURU Autonomous Institute Affiliated to VTU 

# DEPARTMENT OF MATHEMATICS \& HUMANITIES 

Scheme and Syllabus for
I - VIII Semester
2023-24

## DEPARTMENT VISION

Be one of the leading centers for teaching \& research in Mathematics

## DEPARTMENT MISSION

Encourage analytical, independent, rational thinking and enhance problem solving skills of the students

## 2023-2024

Department: Mathematics and Humanities
Semester: I

# B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19 <br> Autonomous Institute, Affiliated to VTU, Belagavi <br> DEPARTMENT OF MATHEMATICS 

## SYLLABUS (2023-2024)

FIRST SEMESTER B.E. (CV, EEE, ETE,ECE, MD, EIE, ME, IEM, AS, CH)

| Course Title | Mathematical Foundation for Civil, <br> Electrical and Mechanical <br> Engineering stream- 1 | Course Code | 23MA1BSCEM |
| :---: | :---: | :---: | :---: |
| Credits | $\mathbf{0 4}$ | L-T - P | $\mathbf{3 - 1 - 0}$ |

## Course Objectives:

The objectives of the course are to facilitate the learners to

- Appreciate the importance of Calculus and Matrix theory in Engineering.
- Gain the knowledge of Calculus and Matrix theory concepts to implement them in their core domain.
- Improve their mathematical thinking and acquire skills required for sustained lifelong learning.

## Teaching-Learning Process (General Instructions)

These are sample strategies which teachers can use to accelerate the attainment of the various course outcomes.

- Lecture method(L) does not mean only traditional method, but different type of teaching methods may be adopted to develop the outcomes.
- Show Video/animation films to explain functioning of various concepts.
- Encourage collaborative (Group Learning) learning in the class.
- Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.
- Adopt Problem Based Learning (PBL), which fosters students’ Analytical skills, develop thinking skills such as the ability to evaluate, generalize, and analyze information rather than simply recall it.
- Topics will be introduced in a multiple representation and encourage the students to come up with their own creative ways to solve them.
- Discuss how every concept can be applied to the real world and when that's possible, it helps to improve the students' understanding.

UNIT - 1
[09 hours]

## Calculus of One Variable:

Introduction to polar coordinates, polar curves, angle between the radius vector and tangent, angle between two curves. Pedal equations.
Curvature and Radius of curvature - Cartesian, Parametric, Polar forms.
Self-study: Center and circle of curvature, evolutes and involutes.
Teaching-Learning Process $\quad$ Chalk and talk method / Power Point Presentation

# B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19 <br> Autonomous Institute, Affiliated to VTU, Belagavi <br> DEPARTMENT OF MATHEMATICS 

| UNIT - 2 |  | 10 hour |
| :---: | :---: | :---: |
| Multivariable Calculus <br> Partial differentiation, total derivative - differentiation of composite functions, Jacobian, Taylor's and Maclaurin's series expansion for two variables (statement only) - problems. <br> Applications: Errors and approximations, Maxima and minima for a function of two variables. Self-study: Euler's theorem and problems. Method of Lagrange's undetermined multipliers with single constraint. <br> (RBT Levels: L1, L2 and L3) |  |  |
| Teaching-Learning Process | Chalk and talk method / Power Point Presentatio |  |
|  |  |  |
| Ordinary Differential Equations of First Order Introduction to first order ordinary differential equations. Bernoulli's differential equations. Exact and reducible to exact differential equations- Integrating factors on and $\frac{1}{N}\left(\frac{\partial M}{\partial y}-\frac{\partial N}{\partial x}\right) \frac{1}{M}\left(\frac{\partial N}{\partial x}-\frac{\partial M}{\partial y}\right)$. <br> Applications: Mixing problem, Orthogonal trajectories. <br> Self-Study: Nonlinear differential equations - Introduction to general and singular solutions, solvable for p , for x and y . Clairaut's equations. <br> (RBT Levels: L1, L2 and L3) |  |  |
| aching-Learning P | Chalk and talk method / Power Point |  |
|  | UNIT - 4 | 10 hou |
| Ordinary Differential Equations of Higher Order <br> Higher-order linear ordinary differential equations with constant coefficients - Inverse differential operator, method of variation of parameters, Cauchy's and Legendre's homogeneous differential equations. <br> Applications:.L-R-C series circuits <br> Self-Study: Formulation and solution of Cantilever beam. Finding the solution by the method of undetermined coefficients. <br> (RBT Levels: L1, L2 and L3) |  |  |
| Teaching-Learning Pro | Chalk and talk |  |
|  |  | [10 hours] |
| Matrices and System of equations <br> Elementary row transformation of a matrix, Rank of a matrix. Consistency and Solution of system of linear equations - Gauss-elimination method, approximate solution by Gauss-Seidel method. Eigenvalues and eigenvectors, Rayleigh's power method to find the dominant Eigenvalue and Eigenvector. <br> Applications: Balancing chemical equations, traffic flow. <br> Self-Study: Solution of a system of linear equations by Gauss-Jacobi iterative method. Inverse of a square matrix by Cayley-Hamilton theorem. <br> (RBT Levels: L1, L2 and L3) |  |  |

# B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19 <br> Autonomous Institute, Affiliated to VTU, Belagavi <br> DEPARTMENT OF MATHEMATICS 

Teaching-Learning Process $\quad$ Chalk and talk method / Power Point Presentation

## Course outcomes (Course Skills Set)

After completing the course successfully, the student will be able to understand the topics:

| Course Code | CO | COURSE OUTCOME (CO) | PO | Strength |
| :---: | :---: | :--- | :---: | :---: |
|  | CO 1 | Apply the concepts of Calculus and Matrix theory <br> in solving problems. | 1 | 3 |
| 23MA1BSCEM | CO 2 | Relate the importance of Calculus and Matrix <br> theory concepts to Engineering. | 1 | 1 |
|  | CO 3 | Demonstrate the understanding of Calculus and <br> Matrix theory concepts through programming <br> skills using modern tool. | 1,5 | 2 |

## Assessment Details (both CIE and SEE)

| Component | Type of assessment | Max. Marks | Total | $\mathbf{5 0} \%$ Weightage | Total |
| :---: | :---: | :---: | :---: | :---: | :---: |
| CIE - <br> Theory | Quiz | 10 |  | 5 |  |
|  | AAT | 10 | 50 | 5 |  |
|  | Test 1 | 40 |  | 20 |  |
|  | Test 2 | 40 |  |  |  |
| SEE | End Exam | 100 |  | 50 |  |

CIE methods/question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

## Semester End Examination:

- Each unit consists of one full question.
- Five full questions to be answered.
- To set one question each from Units $1,3,5$ and two questions each from Unit 2 and Unit 4.

SYLLABUS (2023-2024)
FIRST SEMESTER B.E. (CS, IS, ML, DS, IOT, CSB, Computer and Management, BT)

| Course Title | Mathematical foundation for Computer <br> Science stream -1 | Course Code | 23MA1BSMCS |
| :---: | :---: | :---: | :---: |
| Credits | $\mathbf{4}$ | L-T -P | $\mathbf{3 - 1 - 0}$ |

Course Objectives: The objectives of the course are to facilitate the learners to

- Appreciate the importance of Calculus, Congruences and Matrix theory in computer and allied engineering science.
- Gain the knowledge of Calculus, Congruences and Matrix theory concepts to implement them in their core domain.
- Improve their mathematical thinking and acquire skills required for sustained lifelong learning.

## Teaching-Learning Process (General Instructions)

These are sample strategies, which teachers can use to accelerate the attainment of the various course outcomes.

- Lecture method (L) does not mean only traditional method, but different type of teaching methods may be adopted to develop the outcomes.
- Show Video/animation films to explain functioning of various concepts.
- Encourage collaborative (Group Learning) Learning in the class.
- Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.
- Adopt Problem Based Learning (PBL), which fosters students' Analytical skills, develop thinking skills such as the ability to evaluate, generalize, and analyze information rather than simply recall it.
- Topics will be introduced in a multiple representation and encourage the students to come up with their own creative ways to solve them.
- Discuss how every concept can be applied to the real world and when that's possible, it helps to improve the students' understanding.

## UNIT - 1

[09 hours]

## Calculus of One Variable:

Introduction to polar coordinates, polar curves, angle between the radius vector and tangent, angle between two curves. Pedal equations.
Curvature and Radius of curvature - Cartesian, Parametric, Polar forms.
Self-study: Center and circle of curvature, evolutes and involutes.

[^0]B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19<br>Autonomous Institute, Affiliated to VTU, Belagavi<br>DEPARTMENT OF MATHEMATICS

## UNIT - 2

[10 hours]
Multivariable Calculus
Partial differentiation, total derivative - differentiation of composite functions, Jacobian, Taylor's and Maclaurin's series expansion for two variables (statement only) - problems.
Applications: Maxima and minima for a function of two variables, Gradient descent method.
Self-study: Euler's theorem and problems. Method of Lagrange's undetermined multipliers with single constraint.
(RBT Levels: L1, L2 and L3)

| Teaching-Learning Process | Chalk and talk method / Power Point Presentation |  |
| :---: | :---: | :---: |
|  | $\underline{\text { UNIT - 3 }}$ | [09 hours] |

## Ordinary Differential Equations (ODEs) of First Order

Introduction to first order ordinary differential equations. Bernoulli's differential equations. Exact and reducible to exact differential equations- Integrating factors on $\frac{1}{N}\left(\frac{\partial M}{\partial y}-\frac{\partial N}{\partial x}\right)$ and $\frac{1}{M}\left(\frac{\partial N}{\partial x}-\frac{\partial M}{\partial y}\right)$.
Applications: Growth and decay, Orthogonal trajectories.
Self-Study: Nonlinear differential equations - Introduction to general and singular solutions, solvable for p , for x and y . Clairaut's equations.
(RBT Levels: L1, L2 and L3)
Teaching-Learning Process $\quad$ Chalk and talk method / Power Point Presentation

## UNIT - 4

[10 hours]

## Congruences and its applications

Introduction to Congruences, Linear Congruences, The Chinese Remainder theorem, Solving Polynomials, Linear Diophantine Equation, Euler's Theorem, Wilson Theorem and Fermat's little theorem.
Application: RSA algorithm.
Self-Study: Divisibility, GCD, Properties of Prime Numbers, Fundamental theorem of Arithmetic.
(RBT Levels: L1, L2 and L3)

| Teaching-Learning Process | Chalk and talk method / Power Point Presentation |
| :--- | :--- |

## UNIT - 5

[10 hours]

## Matrices and System of equations

Elementary row transformation of a matrix, Rank of a matrix. Consistency and Solution of system of linear equations - Gauss-elimination method, approximate solution by Gauss-Seidel method. Eigenvalues and eigenvectors, Rayleigh's power method to find the dominant Eigenvalue and Eigenvector.
Applications: Balancing chemical equations, Traffic flow.
Self-Study: Solution of a system of linear equations by Gauss-Jacobi iterative method. Inverse of a square matrix by Cayley- Hamilton theorem.
(RBT Levels: L1, L2 and L3).

- Discuss how every concept can be applied to the real world and when that's possible, it helps to improve the students' understanding.

## UNIT - 1

[11 hours]

## INTEGRAL CALCULUS

Multiple Integrals: Evaluation of double and triple integrals, evaluation of double integrals by change of order of integration, changing into polar coordinates.
Applications: Area(polar curves), Volume by triple integral, Mass of a plane laminar region.
Beta and Gamma functions: Definitions, properties, relation between Beta and Gamma functions.
Self-Study: Moment of Inertia along a particular direction.

## (RBT Levels: L1, L2 and L3)

Teaching-Learning Process $\quad$ Chalk and talk method / Power Point Presentation

## B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19

## UNIT - 2

[10 hours]

## VECTOR CALCULUS

Vector Differentiation: Scalar and vector fields. Gradient, directional derivative, curl and divergence - physical interpretation, solenoidal and irrotational vector fields.

Vector Integration: Line integrals, Green's theorem and Stokes' theorem.
Application: Work done by a force.
Self-Study: Velocity and acceleration of a moving particle. Gauss divergence theorem.
(RBT Levels: L1, L2 and L3)

Assessment Details (both CIE and SEE)

| Component | Type of assessment | Max. Marks | Total | $\mathbf{5 0} \%$ Weightage | Total |
| :---: | :---: | :---: | :---: | :---: | :---: |
| CIE - | Quiz | 10 |  | 5 |  |
|  | Theory | AAT | 10 | 50 | 5 |
|  | Test 1 | 40 |  |  |  |
|  | Test 2 | 40 |  |  |  |
|  | End Exam | 100 |  | 50 |  |

CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

## Semester End Examination:

- Each unit consists of one full question.
- Five full questions to be answered.
- To set one question each from Units 2, 4, 5 and two questions each from Unit 1 and Unit 3.

# B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19 <br> Autonomous Institute, Affiliated to VTU, Belagavi <br> DEPARTMENT OF MATHEMATICS 

SYLLABUS (2023-2024)
SECOND SEMESTER B.E. (CS, IS, ML, DS, IOT, CSB, Computer and Management, BT)

| Course Title | Mathematical foundation for <br> Computer Science Stream-2 | Course Code | 23MA2BSMCS |
| :---: | :---: | :---: | :---: |
| Credits | $\mathbf{4}$ | L-T - P | $\mathbf{3 - 1 - 0}$ |

Course Objectives: The objectives of the course are to facilitate the learners to

- Appreciate the importance of Calculus, Linear Algebra and Numerical methods in computer and allied engineering science.
- Gain the knowledge of concepts of Calculus, Linear Algebra and Numerical techniques to implement them in their core domain.
- Improve their mathematical thinking and acquire skills required for sustained lifelong learning.

## Teaching-Learning Process (General Instructions)

These are sample strategies, which teachers can use to accelerate the attainment of the various course outcomes.

- Lecture method( L ) does not mean only traditional method, but different type of teaching methods may be adopted to develop the outcomes.
- Show Video/animation films to explain functioning of various concepts.
- Encourage collaborative (Group Learning) learning in the class.
- Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.
- Adopt Problem Based Learning (PBL), which fosters students’ Analytical skills, develop thinking skills such as the ability to evaluate, generalize, and analyze information rather than simply recall it.
- Topics will be introduced in a multiple representation and encourage the students to come up with their own creative ways to solve them.
- Discuss how every concept can be applied to the real world and when that's possible, it helps to improve the students' understanding.

## UNIT -1

[11 hours]

## INTEGRAL CALCULUS

Multiple Integrals: Evaluation of double and triple integrals, evaluation of double integrals by change of order of integration, changing into polar coordinates.
Applications: Area(polar curves), Volume by triple integral.
Beta and Gamma functions: Definitions, properties, relation between Beta and Gamma functions.
Self-Study: Duplication formula. Moment of Inertia along a particular direction.
(RBT Levels: L1, L2 and L3)

| Teaching-Learning Process | Chalk and talk method / Power Point Presentation |
| :--- | :--- |

B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19

Autonomous Institute, Affiliated to VTU, Belagavi
DEPARTMENT OF MATHEMATICS
SYLLABUS (2023-2024)
THIRD SEMESTER B.E.
(COMMON TO ALL BRANCHES EXCEPT CIVIL ENGG. \& CS-STREAM)

| Course Title | TRANSFORM CALCULUS, FOURIER <br> SERIES AND NUMERICAL TECHNIQUES | Course Code | 23MA3BSTFN |
| :---: | :--- | :---: | :---: |
| Credits | $\mathbf{0 3}$ | $\mathbf{L}$ - T-P | $\mathbf{2 - 1 - 0}$ |
| Contact Hours | $\mathbf{3 9}$ |  |  |

COURSE OBJECTIVES: The purpose of the course is to facilitate the learners to:

- Appreciate the importance of Series, Transforms and Numerical Techniques in Engineering Problems.
- Acquire the knowledge of Series, Transforms and Numerical Techniques to apply them in their core domain.
- Improve their Mathematical thinking and acquire skills required for sustained lifelong learning.

## TEACHING-LEARNING PROCESS (General Instructions):

These are sample Strategies; that teachers can use to accelerate the attainment of the various course outcomes.

1. In addition to the traditional lecture method, different types of innovative teaching methods may be adopted so that the delivered lessons develop students' theoretical and applied mathematical skills.
2. State the need for Mathematics with Engineering Studies and provide real-life examples.
3. Encourage the students for group learning to improve their creative and analytical skills.

## UNIT-1

## LAPLACE TRANSFORMS:

[08 hours]
Definition and Laplace transform of standard functions (statements only). Problems on Laplace transform of $e^{a t} f(t), t^{n} f(t), \frac{f(t)}{t}$. Laplace transforms of derivatives and integrals. Laplace Transform of periodic functions (statement only) and unit-step function - Problems.

Inverse Laplace transforms: definition and problems. Solution of differential equations.

> | Teaching-Learning Process | Chalk and talk method / PowerPoint Presentation |
| :--- | :--- |

## UNIT-2

## FOURIER SERIES:

Introduction to trigonometric polynomial, trigonometric series. Dirichlet's conditions. Fourier series of periodic functions with period $2 \pi$ and arbitrary period. Complex Fourier series. Practical harmonic analysis.

[^1]
## FOURIER TRANSFORMS:

Definition and problems on Fourier Transform. Fourier sine and cosine transforms - Problems. Inverse Fourier transform, Inverse Fourier cosine and sine transforms - Problems. Convolution theorem (only statement) - problems.

Teaching-Learning Process $\quad$ Chalk and talk method / PowerPoint Presentation

## UNIT-4

NUMERICAL SOLUTION OF PDE:
[07 hours]
Classification of second-order partial differential equations, finite difference approximation of derivatives. Solution of one-dimensional heat equation by Schmidt and Bendre-Schmidt explicit formulae. Solution of one-dimensional wave equation using finite difference method.

Teaching-Learning Process $\quad$ Chalk and talk method / PowerPoint Presentation

## UNIT-5

## CALCULUS OF VARIATIONS:

[08 hours]
Definition, Variation of a functional, Euler-Lagrange equation, variational problems.
Applications: Hanging cable problem, Brachistochrone problem.

## Z-TRANSFORMS:

Definition, Standard Z-transforms, Damping rule, Shifting rule. Inverse Z-transform and applications - Solution of difference equations.

Teaching-Learning Process $\quad$ Chalk and talk method / PowerPoint Presentation
Course outcomes (Course Skills Set)
After successfully completing the course, the student will be able to understand the topics:

| Course Code | CO | COURSE OUTCOME (CO) | PO | Strength |
| :---: | :---: | :--- | :---: | :---: |
|  | CO 1 | Techniques, Calculus of Variation and Finite <br> Difference Apply the concepts of Series, <br> Transform Methods to solve engineering <br> 23MA3BSTFN | 1 | 3 |
|  | CO 2 | Apply the concepts of Transform Techniques, <br> Calculus of Variation and Finite Difference <br> Methods in engineering using modern IT <br> tools. | $1 \& 5$ | 3 |

Autonomous Institute, Affiliated to VTU, Belagavi
DEPARTMENT OF MATHEMATICS
SYLLABUS (2023-2024)
THIRD SEMESTER B.E. COURSE (CS CLUSTER except Machine Learning)

| Course Title | Statistics and Discrete Mathematics | Course Code | 23MA3BSSDM |
| :--- | :--- | :---: | :---: |
| Credits | $\mathbf{0 3}$ | L-T-P | $\mathbf{2 - 1} \mathbf{- 0}$ |
| Contact hours | $\mathbf{3 9}$ |  |  |

Prerequisites: Basic concepts of Permutations, Combinations, probability, statistics, G.C.D., L.C.D., divisors and primes.

Course Objectives: The goal of the course is to

- Appreciate the importance of Discrete Mathematics and statistics in computer and allied engineering science.
- Acquire the knowledge of Discrete Mathematics and Statistics applied in their core domain.
- Improve their Mathematical Thinking and acquire skills required for sustained lifelong learning.

## Teaching-Learning Process (General Instructions)

These are sample Strategies; that teachers can use to accelerate the attainment of the various course outcomes.

- Lecture method (L) does not mean only traditional lecture method, but different types of teaching methods may be adopted to develop the outcomes.
- Show Video/animation films to explain the functioning of various concepts.
- Encourage collaborative (Group Learning) Learning in the class.
- Ask HOT (Higher order Thinking) questions in the class, which promotes critical thinking.
- Adopt Problem Based Learning (PBL), which fosters students’ analytical skills, and develops thinking skills such as the ability to evaluate, generalize, and analyze information rather than simply recall it.
- Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.
- Discuss how every concept can be applied to the real world and when that's possible, it helps to improve the students' understanding.

## UNIT-1

## GRAPH THEORY

[08 hours]
Basic concepts: Types of graphs, order and size of a graph, in-degree and out-degree, connected and disconnected graphs, Eulerian graphs, Hamiltonian graphs, sub-graphs, and Isomorphic graphs. Matrix representation of graphs: adjacency matrix, incidence matrix. Trees: spanning tree, minimal spanning tree: Kruskal's algorithm and shortest path-Dijkstra's algorithm

# B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19 <br> Autonomous Institute, Affiliated to VTU, Belagavi <br> DEPARTMENT OF MATHEMATICS <br> UNIT-2 

PROBABILITY DISTRIBUTIONS
[08 hours]
Theoretical distributions: Discrete and continuous random variables
Discrete distributions: Poisson distribution, Geometric distributions. Continuous distributions: Exponential, Gaussian, Uniform Distribution and Gamma distributions.

```
Teaching-Learning Process Chalk and talk method / PowerPoint Presentation
```

## UNIT-3

## JOINT PROBABILITY AND MARKOV CHAIN

[08 hours]
Joint Probability Distributions: Discrete and continuous joint random variables, Mathematical expectations, Covariance, and Correlation.
Markov Chain: Probability vector, stochastic matrix, fixed point vector, regular stochastic matrix. Higher transition probabilities, stationary distribution of regular Markov chain.

| Teaching-Learning Process | Chalk and talk method / PowerPoint Presentation |
| :--- | :--- |

## UNIT-4

STATISTICAL INFERENCE
[08 hours]
Introduction, procedure for testing of hypothesis, level of significance.
Large sample: Test of significance for single mean and difference between two means.
Small sample: Test of significance for single mean, the difference between two means, paired t-test, ratio of variances (F-distribution) and Chi-Square goodness of fit.

## UNIT-5

COMBINATORICS
[07 hours]
Introduction, Binomial and multinomial theorems, Catalan numbers, the principle of inclusion and exclusion, Derangements, Rook Polynomials.

| Teaching-Learning Process | Chalk and talk method / PowerPoint Presentation |
| :--- | :--- |

Course outcomes (Course Skills Set)
After successfully completing the course, the student will be able to understand the topics:

| Course Code | CO | COURSE OUTCOME (CO) | PO | Strength |
| :---: | :---: | :--- | :---: | :---: |
|  | CO 1 | Apply the concept of Discrete Mathematics <br> and Statistics in Computer and Allied <br> Engineering Science. | 1 | 3 |
|  | CO 2 2 | Demonstrate the Importance of Discrete <br> Mathematics and Statistics using Modern <br> IT Tools. | $1 \& 5$ | 3 |

Autonomous Institute, Affiliated to VTU, Belagavi
DEPARTMENT OF MATHEMATICS
Assessment Details (both CIE and SEE)

| Component | Type of assessment | Max. Marks | Total | 50 \% Weightage | Total |
| :---: | :---: | :---: | :---: | :---: | :---: |
| CIE - Theory | Quiz | 10 |  | 5 |  |
|  | AAT | 10 | 50 | 5 | 50 |
|  | Test 100 | 40 |  | 20 |  |
|  | Test 2 | 40 |  | 50 |  |

CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

## SEMESTER END EXAMINATION:

- Each unit consists of one full question.
- Five full questions to be answered.
- To set one question each from Units $2,3 \& 5$ and two questions each from Unit 1 and Unit 4.

## Text Books:

1. Graph Theory and Combinatorics, D. S. Chandrasekharaiah, $4^{\text {th }}$ edition, 2011-12, Prism Engineering Education Series.
2. Higher Engineering Mathematics, B. V. Ramana, 2007, Tata McGraw Hill.
3. Discrete Mathematics and its applications, Kenneth H. Rosen, $7^{\text {th }}$ edition, McGraw Hill Publishers.

## Reference Books:

1. Discrete Mathematics, Kolman, Busby Ross, $5^{\text {th }}$ Edition, 2004, Prentice Hall.
2. Graph Theory with Applications to Engineering and Computer Science, Narsingh Deo, Eastern Economy Edition, PHI Learning Pvt., Ltd.
3. Mathematics for Machine Learning, Marc Peter Deisennorth, A. Aldo Faisal, Cheng Soon Ong,2020, Cambridge University Press.

DEPARTMENT OF MATHEMATICS

SYLLABUS (2023-2024)
THIRD SEMESTER B.E. COURSE
(Artificial Intelligence and Machine Learning)

| Course Title | Mathematical Foundation <br> for Machine Learning - 1 | Course Code | 23MA3BSMML |
| :--- | :--- | :--- | :--- |
| Credits | $\mathbf{0 3}$ | L-T - P | $\mathbf{2 - 0 - 1}$ |
| Contact hours | $\mathbf{2 6}+\mathbf{0}+\mathbf{1 3}$ |  |  |

## Course Objectives:

The objectives of the course are to facilitate the learners to

- Appreciate the importance of linear algebra in computer and allied engineering science.
- Gain the knowledge of linear algebra tools and concepts to implement them in their core domain.
- Improve their mathematical thinking and acquire skills required for sustained lifelong learning.

## Teaching-Learning Process (General Instructions)

These are sample Strategies; that teachers can use to accelerate the attainment of the various course outcomes.

- Lecture method(L) does not mean only traditional lecture method, but different type of teaching methods may be adopted to develop the outcomes.
- Encourage collaborative (Group Learning) Learning in the class.
- Ask HOT (Higher order Thinking) questions in the class, which promotes critical thinking.
- Adopt Problem-Based Learning (PBL), which fosters students’ Analytical skills, and develops thinking skills such as the ability to evaluate, generalize, and analyze information rather than simply recall it.
- Discuss how every concept can be applied to the real world and when that's possible, it helps to improve the students' understanding.

## UNIT-1

## LINEAR TRANSFORMATIONS -1

[6 hours]
Linear transformations, Matrix as a linear transformation, matrix representation of linear transformations, one-one and onto transformations, singular and non-singular transformations, Determinant of Large matrices and its complexity.

Teaching-Learning Process: Chalk and Board, Problem-based learning

## UNIT-2

LINEAR TRANSFORMATIONS -2
[5 hours]
Algebra of linear transformations, Geometric linear transformations, Composition of linear transformations, Affine Subspaces, Affine transformations.

```
Teaching-Learning Process: Chalk and Board, Problem-based learning
```

# B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19 <br> Autonomous Institute, Affiliated to VTU, Belagavi <br> DEPARTMENT OF MATHEMATICS 

## UNIT-3

## VECTOR NORMS AND INNER PRODUCT SPACES

Norms, Vector norms, matrix norms, $L_{1}$ norm, $L_{\infty}$ norm, the Frobenius norm, condition number, Inner products, lengths and distances, angles and orthogonality, inner product of functions, orthonormal basis.

## Teaching-Learning Process: Chalk and Board, Problem-based learning

## UNIT-4

## APPLICATIONS OF INNER PRODUCT

[5 hours]
Orthogonal complements, Orthogonal projections, Gram-Schmidt process, Orthogonal matrices, least square approximations, rotations, metric spaces.

> | Teaching-Learning Process: | Chalk and Board, Problem-based learning |
| :--- | :--- |

## UNIT-5

## EIGENVALUES AND EIGENVECTORS

[5 hours]
Eigenspaces, Spectral norm, characteristic and minimal polynomials, Eigen decompositions and diagonalizations, diagonalization of symmetric matrices.

```
Teaching-Learning Process: Chalk and Board, Problem-based learning
```

## MATHEMATICS LAB:

2 hours/week per batch of 15 students
1 Introduction + 10 lab sessions + 1 repetition class + 1 Lab Assessment
List of Laboratory experiments:
Lab-0: Introduction
Lab-1: Finding Coordinates of vectors and Matrix of linear maps.
Lab-2: Recursive formula for finding large determinants.
Lab-3: Finding composition and inverse of linear transformations.
Lab-4: Plotting linear and affine transformations.
Lab-5: Finding $L_{1}, L_{\infty}$ and Frobenius norms of vectors and matrices.
Lab-6: Finding angles between vectors and checking orthogonality.
Lab-7: Construction of orthonormal basis.
Lab-8: Least-Square solution of linear system of equations.
Lab-9: Finding eigenspaces and calculating spectral norms.
Lab-10: Eigen decomposition of matrices.

## Course outcomes (Course Skills Set)

After successfully completing the course, the student will be able to understand the topics:

| Course Code | CO | COURSE OUTCOME (CO) | PO | Strength |
| :---: | :---: | :--- | :---: | :---: |
|  | CO 1 | Apply the concepts of Calculus and Linear <br> Algebra to problems in Machine learning. | 1 | 3 |
| 23MA3BSMML | CO 2 | Apply the concepts of Calculus and Linear <br> Algebra to Machine learning through modern <br> IT tools. | $1 \& 5$ | 3 |

Assessment Details (both CIE and SEE)

| Component | Type of assessment | Max. Marks | Total | 50 \% Weightage | Total |
| :---: | :---: | :---: | :---: | :---: | :---: |
| CIE - Theory | Quiz | 10 |  | 5 |  |
|  | AAT | 10 | 100 | 5 | 50 |
|  | Test 1 | 40 |  | 20 |  |
|  | Test 2 | 40 |  | 20 |  |
| SEE | End Exam | 100 |  | 50 |  |

CIE methods/question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

## SEMESTER END EXAMINATION:

- Each unit consists of one full question.
- Five full questions to be answered.
- To set one question each from Units 1, 2 and 4 and two questions each from Units 3 and 5.

| :---: | :--- | :---: | :---: |
| Credits | $\mathbf{0 3}$ | $\mathbf{L}-\mathbf{T}-\mathbf{P}$ | $\mathbf{2 - 1 - 0}$ |
| Contact Hours | $\mathbf{3 9}$ |  |  |

COURSE OBJECTIVES: The purpose of the course is to facilitate the learners to:

- Appreciate the importance of Statistical methods, Probability, Series and Numerical techniques in Engineering Problems.
- Acquire the knowledge of Statistical methods, Probability, Series and Numerical techniques to apply them in their core domain.
- Improve their Mathematical thinking and acquire skills required for sustained lifelong learning.

## TEACHING-LEARNING PROCESS (General Instructions):

These are sample Strategies; that teachers can use to accelerate the attainment of the various course outcomes.

- In addition to the traditional lecture method, different types of innovative teaching methods may be adopted so that the delivered lessons develop students' theoretical and applied mathematical skills.
- State the need for Mathematics with Engineering Studies and provide real-life examples.
- Encourage the students for group learning to improve their creative and analytical skills.

## UNIT-1

## STATISTICAL METHODS:

[08 hours]
Curve Fitting: Fitting the straight line, parabola and geometric curve ( $y=a x^{b}$ ) by the method of least squares.
Correlation and regression - Karl Pearson's coefficient of correlation and rank correlation. Lines of regression, angle between two regression lines.

| Teaching-Learning Process | Chalk and talk method / PowerPoint Presentation |
| :--- | :--- |

UNIT-2

## PROBABILITY DISTRIBUTIONS:

[08 hours]
Review of basic probability theory. Random variables (discrete and continuous), probability mass and density functions. Mathematical expectation, mean and variance. Poisson and normal distributions.

Joint probability distribution: Joint Probability distribution for two discrete random variables, expectation, covariance and correlation.
Teaching-Learning Process $\quad$ Chalk and talk method / PowerPoint Presentation

# B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19 <br> Autonomous Institute, Affiliated to VTU, Belagavi <br> DEPARTMENT OF MATHEMATICS 

UNIT-3

## LAPLACE TRANSFORMS:

Definition and Laplace transform of standard functions (statements only). Problems on Laplace transform of $e^{a t} f(t), t^{n} f(t), \frac{f(t)}{t}$. Laplace transforms of derivatives and integrals. Laplace Transform of periodic functions (statement only) and unit-step function - Problems.

Inverse Laplace transforms: definition and problems. Solution of differential equations.

## Teaching-Learning Process $\quad$ Chalk and talk method / PowerPoint Presentation

## UNIT-4

## FOURIER SERIES:

Introduction to trigonometric polynomial, trigonometric series. Dirichlet's conditions. Fourier series of periodic functions with period $2 \pi$ and arbitrary period. Practical harmonic analysis.
Teaching-Learning Process $\quad$ Chalk and talk method / PowerPoint Presentation

## UNIT-5

NUMERICAL SOLUTION OF PDE:
Classification of second-order partial differential equations, finite difference approximation of derivatives. Solution of one-dimensional heat equation by Schmidt and Bendre-Schmidt explicit formulae. Solution of one-dimensional wave equation using finite difference method.

| Teaching-Learning Process | Chalk and talk method / PowerPoint Presentation |
| :--- | :--- |

## Course outcomes (Course Skills Set)

After successfully completing the course, the student will be able to understand the topics:

| Course Code | CO | COURSE OUTCOME (CO) | PO | Strength |
| :---: | :---: | :--- | :---: | :---: |
|  | CO 1 | Apply the concepts of Statistics, <br> Probability, Series and Numerical <br> techniques to solve engineering problems. | 1 | 3 |

| Course Title | Complex Analysis, Probability and <br> Statistical Methods | Course Code | 23MA4BSCPS |
| :---: | :--- | :---: | :---: |
| Credits | $\mathbf{0 3}$ | L-T - P | $\mathbf{2 - 1 - 0}$ |
| Contact Hours | 40 |  |  |

COURSE OBJECTIVES: The goal of the course is to:

- Appreciate the importance of Complex Analysis, Special Functions, Probability and Statistics in Engineering.
- Acquire the knowledge of Complex Analysis, Special Functions, Probability and Statistics applied in their core domain.
- Improve their Mathematical thinking and acquire skills required for sustained lifelong learning.

## TEACHING-LEARNING PROCESS (General Instructions):

These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.

1. In addition to the traditional lecture method, different types of innovative teaching methods may be adopted so that the delivered lessons shall develop students' theoretical and applied mathematical skills.
2. State the need for Mathematics with Engineering Studies and Provide real-life examples.
3. Encourage the students for group learning to improve their creative and analytical skill.

## UNIT-1

## COMPLEX ANALYSIS

[08 hours]
Review of a function of a complex variable, limits, continuity and differentiability.
Analytic functions, Cauchy-Riemann equations in Cartesian and polar forms and consequences. Construction of analytic functions by Milne-Thomson method.

Complex integration: Line integral of a complex function, Cauchy's theorem and Cauchy's integral formula and problems.

Conformal mapping: $w=z^{2}$ and $w=z+\frac{k^{2}}{z}(z \neq 0)$.
Teaching-Learning Process $\quad$ Chalk and Board, Problem based learning / Presentation

# B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19 <br> Autonomous Institute, Affiliated to VTU, Belagavi <br> DEPARTMENT OF MATHEMATICS 

## UNIT-2

SPECIAL FUNCTIONS:
[08 hours]
Introduction, Ordinary and Singular Points, Series solution of Bessel's differential equation leading to $J_{n}(x)$, Bessel's function of the first kind, Properties, generating function for $J_{n}(x)$. Series solution of Legendre's differential equation leading to $P_{n}(x)$. Legendre polynomials, Rodrigue's formula (without proof) - Problems.

> | Teaching-Learning Process | Chalk and Board, Problem based learning / Presentation |
| :--- | :--- |

## UNIT-3

## STATISTICAL METHODS:

[08 hours]
Curve Fitting: Fitting the straight line, parabola and geometric curve $\left(y=a x^{b}\right)$ by the method of least squares.

Correlation and regression - Karl Pearson's coefficient of correlation and rank correlation. Lines of regression, angle between two regression lines.

## Teaching-Learning Process <br> Chalk and Board, Problem based learning / Presentation

## UNIT-4

## PROBABILITY DISTRIBUTIONS:

[08 hours]
Review of basic probability theory. Random variables (discrete and continuous), probability mass and density functions. Mathematical expectation, mean and variance. Poisson and normal distributions.

Joint probability distribution: Joint Probability distribution for two discrete random variables, expectation, covariance and correlation.

```
Teaching-Learning Process 
```

## UNIT-5

## STATISTICAL INFERENCE:

[08 hours]
Sampling Theory: Introduction to sampling distributions, standard error, Type-I and Type-II errors. Test of hypothesis for means (single mean and difference between two means), student's t-distribution (single mean and difference between two means), Chi-square distribution-goodness of fit.

Teaching-Learning Process $\quad$ Chalk and Board, Problem-based learning / Presentation

Course outcomes (Course Skills Set)

- Appreciate the importance of linear algebra in computer and allied engineering science.
- Gain the knowledge of linear algebra tools and concepts to implement them in their core domain.
- Improve their mathematical thinking and acquire skills required for sustained lifelong learning.

## Teaching-Learning Process (General Instructions)

These are sample Strategies; that teachers can use to accelerate the attainment of the various course outcomes.

- Lecture method $(\mathrm{L})$ does not mean only traditional lecture method, but different type of teaching methods may be adopted to develop the outcomes.
- Encourage collaborative (Group Learning) Learning in the class.
- Ask HOT (Higher order Thinking) questions in the class, which promotes critical thinking.
- Adopt Problem-Based Learning (PBL), which fosters students’ Analytical skills, and develops thinking skills such as the ability to evaluate, generalize, and analyze information rather than simply recall it.
- Discuss how every concept can be applied to the real world and when that's possible, it helps to improve the students' understanding.

## UNIT-1

## CONTINUOUS OPTIMIZATION - 1

Function of several variables, partial differentiation, local and global optima, convex sets and functions separating hyperplanes, application of Hessian matrix in optimization, gradients of vector-valued functions, gradients of matrices, useful identities for computing gradients.

Teaching-Learning Process: Chalk and Board, Problem-based learning

## UNIT-2

## CONTINUOUS OPTIMIZATION-2

Optimization using gradient descent/ascent and NR method.
Sequential search 3-point search and Fibonacci search.
Constrained Optimization, Method of Lagrange multipliers, KKT optimality conditions.

## Teaching-Learning Process: Chalk and Board, Problem-based learning

# B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19 <br> Autonomous Institute, Affiliated to VTU, Belagavi <br> DEPARTMENT OF MATHEMATICS 

## UNIT-3

## INNER PRODUCT SPACES

[7 hours]
Inner products, inner product spaces, length and orthogonality, orthogonal sets and Bases, projections, Gram-Schmidt orthogonalization process, QR-factorization, least squares problem and least square error. Curve fitting - Principle of least squares, fitting a straight line and fitting a parabola.

| Teaching-Learning Process: | Chalk and Board, Problem-based learning |
| :--- | :--- |

## UNIT-4

EIGENVALUES AND EIGENVECTORS
[7 hours]
Introduction, Polynomials of Matrices, Cayley-Hamilton Theorem, eigen spaces of a linear transformation, Characteristic and Minimal Polynomials of Block Matrices, Jordan Canonical form.

> | Teaching-Learning Process: | Chalk and Board, Problem-based learning |
| :---: | :--- |

## UNIT-5

## MATRIX DECOMPOSITION AND THEIR APPLICATIONS

Diagonalization, Orthogonal diagonalization of real symmetric matrices, quadratic forms and its classifications, rank and signature of real quadratic forms, Singular value decomposition. Dimensional reduction - PCA.

Teaching-Learning Process: Chalk and Board, Problem based learning

## Course outcomes (Course Skills Set)

After successfully completing the course, the student will be able to understand the topics:

| Course Code | CO | COURSE OUTCOME (CO) | PO | Strength |
| :---: | :---: | :--- | :---: | :---: |
|  | CO 1 | Apply the concepts of linear algebra in <br> Computer and Allied Engineering Sciences. | 1 | 3 |

# B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19 <br> Autonomous Institute, Affiliated to VTU, Belagavi <br> DEPARTMENT OF MATHEMATICS 

SYLLABUS (2023-2024)
FOURTH SEMESTER B.E. COURSE
(Artificial Intelligence and Machine Learning)

| Course Title | Mathematical Foundation <br> for Machine Learning - 2 | Course Code | 23MA4BSMML |
| :--- | :--- | :--- | :--- |
| Credits | $\mathbf{0 3}$ | L-T - P | $\mathbf{2 - 0 - 1}$ |
| Contact hours | $\mathbf{2 6}+\mathbf{0}+\mathbf{1 3}$ |  |  |

## Course Objectives:

The objectives of the course are to facilitate the learners to:

- Appreciate the importance of linear algebra in computer and allied engineering science.
- Gain the knowledge of linear algebra tools and concepts to implement them in their core domain.
- Improve their mathematical thinking and acquire skills required for sustained lifelong learning.

## Teaching-Learning Process (General Instructions)

These are sample Strategies; that teachers can use to accelerate the attainment of the various course outcomes.

- Lecture method(L) does not mean only traditional lecture method, but different type of teaching methods may be adopted to develop the outcomes.
- Encourage collaborative (Group Learning) Learning in the class.
- Ask HOT (Higher order Thinking) questions in the class, which promotes critical thinking.
- Adopt Problem-Based Learning (PBL), which fosters students' Analytical skills, develops thinking skills such as the ability to evaluate, generalize, and analyze information rather than simply recall it.
- Discuss how every concept can be applied to the real world and when that's possible, it helps to improve the students' understanding.

## UNIT-1

## MATRIX OPERATION IN MACHINE LEARNING

[6 hours]
Matrix decompositions - LU and Cholesky decomposition, singular value decomposition, Data compression with SVD, Dimensionality reduction - Principal Component Analysis, the MoorePenrose pseudoinverse.

$$
\text { Teaching-Learning Process: } \quad \text { Chalk and Board, Problem-based learning }
$$

## UNIT-2

## VECTOR CALCULUS

## [5 hours]

Functions of several variables, Differentiation and partial differentials, gradients of vectorvalued functions, gradients of matrices, useful identities for computing gradients, linearization and multivariate Taylor series.

```
Teaching-Learning Process: Chalk and Board, Problem-based learning
```

# B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19 <br> Autonomous Institute, Affiliated to VTU, Belagavi <br> DEPARTMENT OF MATHEMATICS 

## UNIT-3

## APPLICATIONS OF VECTOR CALCULUS

Backpropagation and automatic differentiation, gradients in a deep network, The Gradient of Quadratic Cost, Descending the Gradient of Cost, The Gradient of Mean Squared Error.

> | Teaching-Learning Process: | Chalk and Board, Problem-based learning |
| :--- | :--- |

## UNIT-4

## UNIVARIATE OPTIMIZATION

Local and global optima, convex sets and functions separating hyperplanes, application of Hessian matrix in optimization, Optimization using gradient descent and NR method, LegendreFenchel Transform and convex conjugates.

> | Teaching-Learning Process: | Chalk and Board, Problem-based learning |
| :--- | :--- |

## UNIT-5

## MULTIVARIABLE OPTIMIZATION

[5 hours]
Sequential search 3-point search and Fibonacci search, constrained optimization using Lagrange multipliers, KKT optimality conditions.

```
Teaching-Learning Process: Chalk and Board, Problem-based learning
```

## MATHEMATICS LAB:

2 hours/week per batch of 15 students
1 Introduction + 10 lab sessions + 1 repetition class + 1 Lab Assessment
List of Laboratory experiments:
Lab-0: Introduction.
Lab-1: Finding LU and Cholesky decomposition.
Lab-2: Finding Singular value decomposition and PCA.
Lab-3: Automatic Differentiation and Backpropagation.
Lab-4: Computing gradients of vector-valued function and matrices.
Lab-5: Computing Hessian Matrices and their eigenvalues.
Lab-6: Computing minimum of quadratic functions using the Gradient descent method.
Lab-7: Finding minimum using NR method.
Lab-8: Lagrange's multiplier method for finding extremum values
Lab-9: Sequential search 3-point search method.
Lab-10: Fibonacci search method.

## Course outcomes (Course Skills Set)

After successfully completing the course, the student will be able to understand the topics:

| Course Code | CO | COURSE OUTCOME (CO) | PO | Strength |
| :---: | :---: | :--- | :---: | :---: |
|  | CO 1 | Apply the concepts of Calculus and Linear <br> Algebra to problems in Machine learning. | 1 | 3 |
| 23MA4BSMML | CO 2 | Apply the concepts of Calculus and Linear <br> Algebra to Machine learning through modern <br> IT tools. | $1 \& 5$ | 3 |

Assessment Details (both CIE and SEE)

| Component | Type of assessment | Max. Marks | Total | $\mathbf{5 0}$ \% Weightage | Total |
| :---: | :---: | :---: | :---: | :---: | :---: |
| CIE - Theory | Quiz | 10 |  | 5 |  |
|  | AAT | 10 | 50 |  |  |
|  | Test 100 | 40 |  | 20 |  |
|  | Test 2 | 40 |  | 20 |  |
| SEE | End Exam | 100 |  | 50 |  |

CIE methods/question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

## SEMESTER END EXAMINATION:

- Each unit consists of one full question.
- Five full questions to be answered.
- To set one question each from Units 2, 3 and 5 and two questions each from Units 1 and 4.

## SUGGESTED LEARNING RESOURCES:

## Text Books:

1. Mathematics for Machine learning, Marc Peter Deisennroth, A. Aldo Faisal, Cheng Soon Ong, 2020, Cambridge University Press.
2. Linear Algebra and its applications, David C. Lay, Steven R. Lay, Judi J Mc. Donald, 6th Edition, 2021, Pearson Education.
3. Linear Algebra: An Introduction, Richard Bronson \& Gabriel B. Costa, 2nd edition, Academic press.

## Reference Books:

1. Linear Algebra and Optimization for Machine Learning, Charu C. Aggarwal, Springer, 2020.
2. Linear Algebra, Stephen H. Friedberg, Arnold J. Insel and Lawrence E. Spence, Pearson, 2019, Fifth Edition.
3. Schaum's outline series -Theory and problems of linear algebra, Seymour Lipschutz, Marc Lipson, 6th edition, 2017, McGraw-Hill Education.
4. Linear Algebra and its Applications, Gilbert Strang, 4th edition, 2005, Brooks Cole.
5. Linear Algebra, Kenneth Hoffman, Ray Kunze, $2^{\text {nd }}$ edition, Pearson.

DEPARTMENT OF MATHEMATICS
SYLLABUS (2023-2024)
FOURTH SEMESTER B.E. (Medical Electronics)

| Course Title | Mathematical Methods for Medical <br> Electronics | Course Code | 23MA4BSMMD |
| :---: | :--- | :---: | :---: |
| Credits | $\mathbf{0 3}$ | L-T - P | $\mathbf{2 - 1 - 0}$ |
| Contact Hours | 40 |  |  |

COURSE OBJECTIVES: The goal of the course is to:

- Appreciate the importance of Complex Analysis, Special Functions, Probability and Statistics in Engineering.
- Acquire the knowledge of Complex Analysis, Special Functions, Probability and Statistics applied in their core domain.
- Improve their Mathematical thinking and acquire skills required for sustained lifelong learning.

## TEACHING-LEARNING PROCESS (General Instructions):

These are sample Strategies, that teachers can use to accelerate the attainment of the various course outcomes.

1. In addition to the traditional lecture method, different types of innovative teaching methods may be adopted so that the delivered lessons shall develop students' theoretical and applied mathematical skills.
2. State the need for Mathematics with Engineering Studies and Provide real-life examples.
3. Encourage the students for group learning to improve their creative and analytical skill.

## UNIT-1

## COMPLEX ANALYSIS

[08 hours]
Review of a function of a complex variable, limits, continuity and differentiability.
Analytic functions, Cauchy-Riemann equations in Cartesian and polar forms and consequences. Construction of analytic functions by Milne-Thomson method-Problems.

Complex integration: Line integral of a complex function, Cauchy's theorem, Cauchy's integral formula and problems.
Conformal mapping: $w=z^{2}$ and $w=z+\frac{k^{2}}{z}(z \neq 0)$.
Teaching-Learning Process $\quad$ Chalk and Board, Problem based learning / Presentation
B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19

Autonomous Institute, Affiliated to VTU, Belagavi
DEPARTMENT OF MATHEMATICS

UNIT-2

## STATISTICAL METHODS:

[08 hours]
Curve Fitting: Fitting the straight line, parabola and geometric curve $\left(y=a x^{b}\right)$ by the method of least squares.

Correlation and regression - Karl Pearson's coefficient of correlation and rank correlationproblems. Lines of regression, angle between two regression lines - problems.

| Teaching-Learning Process | Chalk and Board, Problem based learning / Presentation |
| :--- | :--- |

## UNIT-3

## PROBABILITY DISTRIBUTIONS:

[08 hours]
Review of basic probability theory. Random variables (discrete and continuous), probability mass and density functions. Mathematical expectation, mean and variance. Poisson and normal distributions- problems - Illustrative examples.
Joint probability distribution: Joint Probability distribution for two discrete random variables, expectation, covariance and correlation.

| Teaching-Learning Process | Chalk and Board, Problem based learning / Presentation |
| :--- | :--- |

## UNIT-4

## STATISTICAL INFERENCE-1:

[08 hours]
Sampling Theory: Introduction to sampling distributions, standard error, Type-I and TypeII errors. Test of hypothesis for means (single mean and difference between two means), student's $t$-distribution (single mean and difference between two means), paired $t$ - test.

| Teaching-Learning Process | Chalk and Board, Problem based learning / Presentation |
| :--- | :--- |

## UNIT-5

## STATISTICAL INFERENCE -2:

[08 hours]
Test of significance for single proportion [Large sample], difference between two proportions [Large sample], ratio of variances (F- distribution), Chi -Square distribution-goodness of fit. Analysis of variance (one-way).

| Teaching-Learning Process | Chalk and Board, Problem based-learning / Presentation |
| :--- | :--- |

## Course outcomes (Course Skills Set)

After successfully completing the course, the student will be able to understand the topics:

| Course Code | CO | COURSE OUTCOME (CO) | PO | Strength |
| :---: | :---: | :--- | :---: | :---: |
| 22MA4BSCPS | CO 1 | Apply the concepts of complex variables, <br> probability and statistics to solve engineering <br> problems. | 1 | 3 |
|  | CO 2 | Apply the concepts of complex variables, and <br> statistical methods using modern IT tools. | $1 \& 5$ | 3 |

Autonomous Institute, Affiliated to VTU, Belagavi
DEPARTMENT OF MATHEMATICS
Assessment Details (both CIE and SEE)

SYLLABUS (2023-2024)
FOURTH SEMESTER B.E. COURSE (BT)

| Course Title | Biostatistics and Design of Experiments | Course Code | 23MA4BSBDE |
| :--- | :--- | :--- | :--- |
| Credits | $\mathbf{3}$ | $\mathbf{L}-\mathbf{T}-\mathbf{P}$ | $\mathbf{2 - 1 - 0}$ |
| Contact hours | $\mathbf{4 0}$ |  |  |

## Pre-requisites:

- Basic concepts of Statistics,
- Basic concepts of Probability- addition theorem, conditional probability, Bayes' theorem, discrete random variable - Binomial distribution.

## Course Objectives:

- Students will get acquainted with the procedure of collecting, designing, analyzing, and drawing inferences about the data.
- To understand the fundamentals of design and the methods of optimization.

## Teaching-Learning Process (General Instructions)

The sample strategies, which the teacher can use to accelerate the attainment of the various course outcomes are listed in the following:

- Explanation via real-life problem, situation modelling, and deliberation of solutions, hands-on sessions, reflective and questioning /inquiry-based teaching.
- Instructions with interactions in classroom lectures (physical/hybrid).
- Use of ICT tools, including YouTube videos, related MOOCs, AR/VR/MR tools.
- Flipped classroom sessions ( $\sim 10 \%$ of the classes).
- Industrial visits, Guest talks, and competitions for learning beyond the syllabus.
- Students' participation through audio-video-based content creation for the syllabus (as assignments).
- Use of gamification tools (in both physical/hybrid classes) for creative learning outcomes.
- Students' seminars (in solo or group) /oral presentations.

## UNIT-1

## STATISTICS \& PROBABILITY DISTRIBUTIONS

[08 hours]
Curve fitting: $y=a+b x, y=a+b x+c x^{2}, y=a b^{x}$; Correlation and regression; Introduction to Probability; Discrete distribution - Poisson; Continuous distributions - Normal.

# B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19 <br> Autonomous Institute, Affiliated to VTU, Belagavi <br> DEPARTMENT OF MATHEMATICS 

## UNIT-2

STATISTICAL INFERENCE - I
[08 hours]
Introduction - Sampling, Estimation - point, interval; Construction of confidence interval; Procedure for testing of hypothesis- level of significance. Test of significance for single proportion [Large sample], difference between two proportions [Large sample], ratio of variances ( F - distribution), Chi -Square distribution-goodness of fit.

| Teaching-Learning Process | Chalk and talk method / PowerPoint Presentation |
| :--- | :--- |

## UNIT-3

## STATISTICAL INFERENCE - II [COMPARISON OF MEANS]

[08 hours]
Parametric test - Test of significance for single mean \& difference of two means [Small \& large sample], paired t- test, Analysis of variance (one-way).
Non-parametric test - Kruskal Wallis One Way Analysis of Variance by Ranks, Wilcoxon Signed Rank Test, Wilcoxon Mann-Whitney Test.

Teaching-Learning Process $\quad$ Chalk and talk method / PowerPoint Presentation

## UNIT-4

## DESCRIPTIVE STATISTICS

[08 hours]
Types of variables, measure of spread, logarithmic transformations, multivariate data. Basics of study design, cohort studies, model fitting.

Teaching-Learning Process $\quad$ Chalk and talk method / PowerPoint Presentation

## UNIT-5

DESIGN AND ANALYSIS OF EXPERIMENTS
[08 hours]
Principles of experimental design, Randomized block design, Completely Randomized block design, Latin Square Design, Factorial Experiments with case studies.

Teaching-Learning Process $\quad$ Chalk and talk method / PowerPoint Presentation

On completion of the course, student will have the ability to:

| Course Code | $\mathrm{CO} \#$ | Course Outcomes | PO | Strength |
| :---: | :---: | :--- | :---: | :---: |
|  | CO 1 | Analyze and interpret the statistical data for <br> bioscience and allied engineering. | 1,2 | 3 |
| 23MA4BSBDE | CO 2 | Design and demonstrate the use of Statistical <br> tools to analyze the real-world examples of <br> bioscience and allied engineering as a team. | $5,9,10$ | 3 |

SYLLABUS (2023-2024)
FOURTH SEMESTER B. E. COURSE - (CHEMICAL ENGINEERING)

| Course Title | Statistics and Probability | Course Code | 23MA4BSSAP |  |
| :---: | :---: | :---: | :---: | :---: |
| Credits | 03 | L-T - P | $\mathbf{2 - 1 - 0}$ |  |
| Contact hours | $\mathbf{4 0}$ hours |  |  |  |

Prerequisites: Basic concepts of Statistics and Probability, addition theorem, conditional probability, Bayes' theorem, discrete random variable, Binomial distribution. Basic concepts of statistics. Matrices.

## Course Objectives:

- To get acquainted with the procedure of collecting, designing, analyzing, and drawing inferences about the data
- To have insight into Statistical methods, Correlation, and Regression analysis.
- To develop probability distribution of discrete and continuous random variables, Joint probabilitydistribution occurs in design engineering.

## Teaching-Learning Process (General Instructions)

These are sample Strategies; that teachers can use to accelerate the attainment of the various course outcomes.

- In addition to the traditional lecture method, different types of innovative teaching methods may be adopted so that the delivered lessons shall develop students' theoretical and applied mathematical skills.
- State the need for Mathematics with Engineering Studies and Provide real-life examples.
- Support and guide the students for self-study.
- You will also be responsible for assigning homework, grading assignments and quizzes, and documenting students' progress.
- Encourage the students for group learning to improve their creative and analytical skills.

## UNIT-1

STATISTICS AND PROBABILITY
[08 hours]
Curve fitting - Principle of least squares, fitting a straight line, fitting of a parabola, fitting of the exponential curve of the $y=a b^{x}$. Correlation and Regression.
Probability distributions: Discrete distribution - Poisson distribution. Continuous distributionNormal distribution.

## Pedagogy: $\quad$ Chalk and Board, Problem based learning.

## UNIT-2

JOINT PROBABILITY AND MARKOV CHAIN
[08 hours]
Joint Probability Distributions: Discrete random variables, Mathematical expectations, Covariance and Correlation.
Markov Chain: Markov Chain, Probability vectors, stochastic matrices, fixed point vector, regular stochasticmatrices. Higher transition probabilities, stationary distribution of regular Markov chain.

# B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19 <br> Autonomous Institute, Affiliated to VTU, Belagavi <br> DEPARTMENT OF MATHEMATICS 

## UNIT-3

STATISTICAL INFERENCE - I
[08 hours]
Introduction, estimation - point, interval; procedure for testing of hypothesis, level of significance, construction of confidence interval.
[Large sample] Test of significance for single mean, difference between two means, single proportion, difference between two proportions, and difference of two Standard deviations.
Pedagogy: $\quad$ Chalk and Board, Problem-based learning.

## UNIT-4

[08 hours]
STATISTICAL INFERENCE - II
[Small sample] Test of significance for single mean, difference between two means, paired t-test, ratio of variances ( F - distribution), Chi-Square distribution-goodness of fit, independence of attributes. Analysis of variance (one-way and two-way classifications).

\section*{| Pedagogy: | Chalk and Board, Problem-based learning. |
| :--- | :--- |}

## UNIT-5

DESIGN OF EXPERIMENTS
Principles of experimental design - Randomization, Replication, Local Control. Randomized block design, Completely Randomized block design, Latin Square DesignProblems.
Pedagogy: $\quad$ Chalk and Board, Problem-based learning.
On Completion of the course, student will have the ability to:

| Course Code | CO \# | COURSE OUTCOME (CO) | PO | Strength |
| :--- | :---: | :--- | :---: | :---: |
|  | CO 1 | Apply the basic principles of statistics and <br> probability, Markov chain, and design of <br> experiments to the problems in Engineering. | 1 | 3 |
| 23MA4BSSAP | CO 2 | Apply the concepts of Sampling distributions <br> to Analyze and interpret the data from real- <br> world examples. | 1 | 3 |
|  | CO 3 | Demonstrate an understanding of sampling <br> distributions and principles of experimental <br> design. | $1,6,9$, <br> 10 | 3 |

Assessment Details (both CIE and SEE)

| Component | Type of assessment | Max. Marks | Total | 50 \% Weightage | Total |
| :---: | :---: | :---: | :---: | :---: | :---: |
| CIE - <br> Theory | Quiz | 10 | 100 | 5 | 50 |

SYLLABUS (2022-2023)
THIRD SEMESTER B.E. (FOR LATERAL ENTRY STUDENTS)

| Course Title | Additional Mathematics - I | Course Code | 22MA3BSMAT |
| :--- | :--- | :--- | :--- |
| Credits | 0 | L-T - P | $2-1-0$ |
| Contact Hours | 40 |  |  |

Course Objectives: The objective of the course is

- To facilitate the students with a foundation of differential calculus \& analytical methods for solving engineering problems.

## Teaching-Learning Process (General Instructions):

These are sample Strategies, which teachers can use to accelerate the attainment of the various course outcomes.

1. In addition to the traditional lecture method, different types of innovative teaching methods may be adopted so that the delivered lessons shall develop students' theoretical and applied mathematical skills.
2. State the need for Mathematics with Engineering Studies and Provide real-life examples.

## UNIT -1

DIFFERENTIAL AND INTEGRAL CALCULUS:
[8 Hours]
List of standard derivatives including hyperbolic functions, rules of differentiation. Polar curves, angle between the radius vector and the tangent, angle between two curves (No proof). Taylor's and Maclaurin's series expansion for one variable (Statement only) - problems.
List of standard integrals, integration by parts. Definite integrals-problems.
( $6 \mathrm{~L}+2 \mathrm{~T}$ )

| Teaching-Learning Process | Chalk and talk method / PowerPoint Presentation |
| :--- | :--- |

## UNIT -2

## MULTIVARIATE CALCULUS

[08 hours]
Partial differentiation, total derivative-differentiation of composite functions. Jacobian and problems. Vector Differentiation: Scalar and vector fields. Gradient, directional derivative, curl and divergence physical interpretation, solenoidal and irrotational vector fields. Problems.
(6L+2T)

| Teaching-Learning Process | Chalk and talk method / PowerPoint Presentation |
| :--- | :--- |

## UNIT -3

ORDINARY DIFFERENTIAL EQUATIONS (ODE's) OF FIRST ORDER [08 hours]
Bernoulli's differential equations. Exact and reducible to exact differential equations. Applications of ODE's - Orthogonal trajectories.
Nonlinear differential equations: Introduction to general and singular solutions; Solvable for $p$ only.
(6L+2T)
Teaching-Learning Process
Chalk and talk method / PowerPoint Presentation

# B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19 <br> Autonomous Institute, Affiliated to VTU <br> DEPARTMENT OF MATHEMATICS 

## UNIT -4

ORDINARY DIFFERENTIAL EQUATIONS OF HIGHER ORDER
[08 hours]
Higher-order linear ODE's with constant coefficients - Inverse differential operator, method of variation of parameters, Cauchy's and Legendre homogeneous differential equations. Problems.
(6L+2T)

| Teaching-Learning Process | Chalk and talk method / Power Point Presentation |
| :--- | :--- |

## UNIT -5

## PARTIAL DIFFERENTIAL EQUATIONS (PDE's)

[08 hours]
Formation of PDE's by elimination of arbitrary constants and functions. Solution of non-homogeneous PDE by direct integration. Solution of PDE by the method of separation of variables. Solution of Lagrange's linear PDE. Derivation of one-dimensional heat equation and wave equation.
(6L+2T)
Teaching-Learning Process $\quad$ Chalk and talk method / Power Point Presentation

## Course outcomes (Course Skills Set)

After successfully completing the course, the student will be able to understand the topics:

| Course Code | CO | COURSE OUTCOME (CO) | PO |
| :---: | :---: | :--- | :---: |
| 22MA3IMMAT | CO 1 | Demonstrate the concepts of differential calculus <br> and Integral Calculus. | 1 |
|  | CO 2 | Apply the concepts of differential calculus to solve <br> ordinary and partial differential equations | 1 |

## Assessment Details (CIE)

| Component | Type of <br> assessment | Max. <br> Marks | Total | $\mathbf{5 0 \% \%}$ <br> Weightage | Total |
| :---: | :---: | :---: | :---: | :---: | :---: |
| CIE - Theory | Quiz 1 | 10 |  | 05 |  |
|  | Quiz 2 | 10 | 100 | 05 | 50 |
|  | Test 1 | 40 |  | 20 |  |
|  | Test 2 | 40 |  | 20 |  |

CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

## Suggested Learning Resources:

## Text Books

1. B. S. Grewal: "Higher Engineering Mathematics", Khanna publishers, 44th Ed.2018.
2. E. Kreyszig: "Advanced Engineering Mathematics", John Wiley \& Sons, 10th Ed. (Reprint), 2016.

## Reference Books

1. B.V. Ramana: "Higher Engineering Mathematics" McGraw-Hill Education, $11^{\text {th }}$ Ed.
2. Srimanta Pal \& Subodh C. Bhunia: "Engineering Mathematics" Oxford University Press, 3rd Reprint, 2016.
3. N. P. Bali and Manish Goyal: "A textbook of Engineering Mathematics" Laxmi Publications, Latest edition.
4. C. Ray Wylie, Louis C. Barrett: "Advanced Engineering Mathematics" McGraw - Hill Book Co. Newyork, Latest ed.
5. Gupta C.B, Sing S.R and Mukesh Kumar: "Engineering Mathematic for Semester I and II", Mc- Graw Hill Education (India) Pvt. Ltd 2015.
6. H. K. Dass and Er. Rajnish Verma: "Higher Engineering Mathematics" S. Chand Publication (2014).
7. James Stewart: "Calculus" Cengage publications, $7^{\text {th }}$ edition, $4^{\text {th }}$ Reprint 2019.

DEPARTMENT OF MATHEMATICS
SYLLABUS (2022-2023)
FOURTH SEMESTER B.E. (FOR LATERAL ENTRY STUDENTS)

| Course Title | Additional Mathematics - II | Course Code | 22MA4BSMAT |
| :--- | :--- | :--- | :--- |
| Credits | $\mathbf{0}$ | L-T-P | $\mathbf{2 - 1 - 0}$ |

Course Objectives: The objective of the course is

- To facilitate the students with a foundation of integral calculus.
- To facilitate the students with a foundation of vector calculus, linear algebra and numerical techniques

## Teaching-Learning Process (General Instructions):

These are sample Strategies; which teachers can use to accelerate the attainment of the various course outcomes.

1. In addition to the traditional lecture method, different types of innovative teaching methods may be adopted so that the delivered lessons shall develop students' theoretical and applied mathematical skills.
2. State the need for Mathematics with Engineering Studies and Provide real-life examples

## UNT-1

## NUMERICAL METHODS - 1

[08 hours]
Elementary row transformation of a matrix, Rank of a matrix. Consistency and Solution of system of linear equations; Gauss-elimination method and Approximate solution by GaussSeidel method. Eigenvalues and Eigenvectors.

| Teaching-Learning Process | Chalk and talk method / Power Point Presentation |
| :--- | :--- |

## UNIT-2

## NUMERICAL METHODS -2

Solution of algebraic and transcendental equations: Regula-Falsi and Newton-Raphson methods (only formulae). Problems.
Finite differences, Interpolation using Newton's forward and backward difference formulae and Lagrange's interpolation formula (without proof). Problems.
Numerical integration: Simpson's $(1 / 3)^{\text {rd }}$ and (3/8) ${ }^{\text {th }}$ rules(without proof): Problems.

| Teaching-Learning Process | Chalk and talk method / Power Point Presentation |
| :--- | :--- |

## UNIT-3

## NUMERICAL METHODS -3

[08 hours]

## Numerical Solution of Ordinary Differential Equations (ODE's):

Numerical solution of ordinary differential equations of first order and first degree: Taylor's series method, Modified Euler's method, Runge-Kutta method of fourth-order, Milne's predictor-corrector formula (No derivations of formulae). Problems.
B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19

Autonomous Institute, Affiliated to VTU, Belagavi
DEPARTMENT OF MATHEMATICS

## UNIT-4

## INTEGRAL CALCULUS

[08 hours]
Multiple Integrals: Evaluation of double integrals, evaluation of double integrals by change of order of integration, changing into polar coordinates. Evaluation of triple integrals. Problems.

| Teaching-Learning Process | Chalk and talk method / PowerPoint Presentation |
| :--- | :--- |

## UNIT-5

BETA-GAMMA FUNCTIONS AND VECTOR INTEGRATION
[8 Hours]
Beta and Gamma functions: Definitions, properties, the relation between Beta and Gamma functions.
Vector Integration: Line integral, Green's theorem and Stokes' theorem
Teaching-Learning Process $\quad$ Chalk and talk method / PowerPoint Presentation
Course outcomes (Course Skills Set)
After successfully completing the course, the student will be able to understand the topics:

| COURSE CODE | CO | COURSE OUTCOME (CO) | PO |
| :---: | :---: | :--- | :---: |
|  | CO 1 | Apply the concepts of linear algebra and <br> numerical methods | 1 |
|  | CO 2 | Apply the concepts of integral calculus | 1 |

## Assessment Details:

| Component | Type of assessment | Max. Marks | Total | $50 \%$ <br> Weightage | Total |
| :---: | :---: | :---: | :---: | :---: | :---: |
| CIE - <br> Theory | Quiz 1 | 10 | 100 | 05 | 50 |
|  | Quiz 2 | 10 |  | 05 |  |
|  | Test 1 | 40 |  | 20 |  |
|  | Test 2 | 40 |  | 20 |  |

CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19<br>Autonomous Institute, Affiliated to VTU, Belagavi<br>DEPARTMENT OF MATHEMATICS

PROPOSED SYLLABUS (2023-2024)
SIXTH SEMESTER B.E. COURSE

| Course Title | MATHEMATICAL STATISTICS Course Code <br> FOR ENGINEERS | 23MA6OESFE |  |
| :--- | :--- | :--- | :--- |
| Credits | $\mathbf{0 3}$ | L-T-P | $\mathbf{2 - 1 - 0}$ |
| Contact hours | $\mathbf{3 6}$ |  |  |

Prerequisites: Basic concepts of Permutations, Combinations, Probability and Statistics
Course Objectives: The goal of the course is to

- Appreciate the importance of probability and statistics in engineering science.
- Acquire the knowledge of probability and statistics applied in their core domain.
- Improve their Mathematical Thinking and acquire skills required for sustained lifelong learning.

## Teaching-Learning Process (General Instructions)

These are sample Strategies; which teachers can use to accelerate the attainment of the various course outcomes.

- Lecture method (L) does not mean only traditional lecture method, but different type of teaching methods may be adopted to develop the outcomes.
- Show Video/animation films to explain functioning of various concepts.
- Encourage collaborative (Group Learning) Learning in the class.
- Ask at least three HOT (Higher order Thinking) questions in the class, which promotes critical thinking.
- Adopt Problem Based Learning (PBL), which fosters students' analytical skills, develop thinking skills such as the ability to evaluate, generalize, and analyze information rather than simply recall it.
- Show the different ways to solve the same problem and encourage the students to come up with their own creative ways to solve them.
- Discuss how every concept can be applied to the real world and when that's possible, it helps to improve the students' understanding.

## UNIT-1

DESCRIPTIVE STATISTICS
[07 hours]
Introduction to Statistics and Data Analysis - Measure of Central Tendency, Measure of Dispersion.

UNIT-2

# B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19 <br> Autonomous Institute, Affiliated to VTU, Belagavi <br> DEPARTMENT OF MATHEMATICS 

distribution.
Continuous distributions: Uniform Distribution, Gamma distributions, t-distribution, Fdistribution and chi-square distribution.

| Teaching-Learning Process | Chalk and talk method / PowerPoint Presentation |
| :--- | :--- |

## UNIT-3

INFERENTIAL STATISTICS
[07 hours]
Sampling distribution, central limit theorem, weak law for large numbers, Chebyshev's inequality, Markovian inequality, Moment of generating function.

Teaching-Learning Process Chalk and talk method / PowerPoint Presentation

## UNIT-4

## ESTIMATION:

[07 hours]
Parameter estimation-Point and interval; Estimation error-bias, variance and risk, Method of moments, Estimator design approach- Maximum Likelihood, confidence interval.

| Teaching-Learning Process | Chalk and talk method / PowerPoint Presentation |
| :--- | :--- |

## UNIT-5

## HYPOTHESIS TESTING:

[07 hours]
Introduction, parametric testing: Proportion, one way and 2-way ANOVA.
Non-parametric test: Chi-square-Independence of attribute, Homogeneity data, MannWhitney test and Wilcoxon-signed Rank test

| Teaching-Learning Process | Chalk and talk method / PowerPoint Presentation |
| :---: | :---: |

## Course outcomes (Course Skills Set)

After successfully completing the course, the student will be able to understand the topics:

| Course Code | CO | COURSE OUTCOME (CO) | PO | Strength |
| :---: | :---: | :--- | :---: | :---: |
|  | CO 1 | Understanding the fundamentals of <br> statistics. | 1 | 3 |
| 23MA6OESFE | CO 2 | lnalyze and interpret the statistical data for <br> engineering. | 1,2 | 3 |
|  | CO 3 | Demonstrate the use of statistical tools to <br> analyze the real-world examples of <br> engineering as a team. | $5,9,10$ | 3 |

Assessment Details (both CIE and SEE)

| Component | Type of <br> assessment | Max. <br> Marks | Total | $\mathbf{5 0 \% \%}$ <br> Weightage | Total |
| :---: | :---: | :---: | :---: | :---: | :---: |
| CIE - Theory | Quiz | 10 | 100 | 5 | 50 |
|  | AAT | 10 |  | 5 |  |

B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19

Autonomous Institute, Affiliated to VTU, Belagavi
DEPARTMENT OF MATHEMATICS

|  | Test 1 | 40 |  | 20 |  |
| :---: | :---: | :---: | :--- | :--- | :---: |
|  | Test 2 | 40 |  | 20 |  |
| SEE | End Exam | 100 |  | 50 |  |

CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

## SEMESTER END EXAMINATION:

- Each unit consists of one full question.
- Five full questions to be answered.
- To set one question each from Units $1,3 \& 4$ and two questions each from Unit 2 and Unit 5.

## Text Books:

1. Introduction to Probability and Statistics for Engineers and Scientists, Sheldon M. Ross, $5^{\text {th }}$ edition, Elsevier.
2. Fundamentals of Mathematical Statistics, S.C. Gupta and V.K. Gupta, Sultan Chand and Sons publishers.

## Reference Books:

1. Basic Statistical Methods for Engineers and Scientists, Kennedy, J. B., and Neville, A. M., (1986), 3rd edition, Harper and Row.
2. Basic Statistical Methods for Engineers and Scientists Miller, I. R., Freund, J. E., and Johnson, R., (1990x, 4th edition, Prentice-Hall.

BMS COLLEGE OF ENGINEERING, BENGALURU-19
Autonomous Institute, Affiliated to VTU
DEPARTMENT OF MATHEMATICS
SIXTH SEMESTER-INSTITUTIONALELECTIVE

| Course Title | NUMERICAL METHODS <br> FOR ENGINEERS | Course Code | 20MA6IENME |
| :--- | :--- | :--- | :--- |
| Credits | $\mathbf{0 3}$ | L-T $-\mathbf{P}$ | $\mathbf{3 - 0}-\mathbf{0}$ |
| Contact hours | 39 hours |  |  |

Prerequisites: Matrix theory, Differential and Integral Calculus, Differential Equations.
Course Objectives: The purpose of the course is to encourage the students to apply numerical techniques. To enhance computational skills for solving mathematical equations. To train the students to solve the complex engineering problems in their respective domain.

## UNIT-1 <br> ITERATIVE METHODS FOR SYSTEM OF EQUATIONS AND EIGEN VALUES AND VECTORS: <br> [07 hours]

Fixed point iteration methods, Thomas algorithm for tri-diagonal systems, Newton's method for solving nonlinear systems, Power Method, Rayleigh Power method, Jacobi's Methods, Given's Method.

## UNIT-2

INTERPOLATION, NUMERICAL DIFFERENTIATION AND INTEGRATION: [08 hours]
Linear interpolation, Piecewise polynomial interpolation: Cubic spline interpolation.
Stiriling's formula and Bessel's formula. Richardson extrapolation.
Boole's and Romberg integration. Evaluation of Double Integrals using Numerical Methods Trapezoidal Rule - Simpson's Rule.

## UNIT-3

METHODS FOR INITIAL VALUE PROBLEMS:
[08 hours]
Predictor-Corrector methods- Milne's method -Adam's Bashforth method. Finite difference methods. Relaxation Methods; Solution of Eigen value problems (ODE). Solving system of ODE using Runge-Kutta $2^{\text {nd }}$ and $4^{\text {th }}$ order methods.

UNIT-4
METHODS FOR BOUNDARY VALUE PROBLEMS:
[08 hours]
Introduction to boundary value problem (BVP): Solving BVP using Shooting method, Finite difference method, cubic spline method and successive over Relaxation (SOR) method.
Solution of integral equations using finite difference method.

## UNIT-5

## METHODS FOR PARTIAL DIFFERENTIAL EQUATIONS:

[08 hours]
Solution of Elliptic PDEs, Poisson's equations, Finite difference method for 1D elliptic problem, Finite difference method for 2D elliptic problem, Finite difference for parabolic problems (generality), Lax-Wendorff method, ADI method and SOR Method.
******
On completion of the course, student will have the ability to:

| Course Code | CO \# | COURSE OUTCOME (CO) | PO | Bloom's <br> level |
| :--- | :---: | :--- | :--- | :---: |
| 20MA6IENME | CO 1 | Determine the solution of the non- <br> linear system of equations | $1,2,5$ | 3 |
|  | CO 2 | Compute the Eigen values and <br> corresponding Eigen vectors using <br> iterative methods | $1,2,5$ | 3 |
|  | Apply numerical techniques to find <br> differentiation and integration. | $1,2,5$ | 3 |  |
|  | CO 44 | Interpret the solutions of ordinary <br> differential equations | $1,2,3,5$ | 3 |
|  | CO 5 | Analyze the numerical solutions of <br> partial differential equations | $1,2,3,5$ | 3 |

## Text Books:

2. https://ocw.mit.edu/courses/mechanical-engineering/2-993j-introduction-to-numerical-analysis-for-engineering-13-002j-spring-2005/

## Question Paper Pattern:

1. Five full questions to be answered
2. To set SEE question paper, one question each in Units 1, 2, 5 and two questions each in Unit 3 and Unit 4.

Autonomous Institute, Affiliated to VTU
DEPARTMENT OF MATHEMATICS
SEVENTH SEMESTER-INSTITUTIONAL ELECTIVE

| Course Name | Computational Graph <br> Theory | Course Code | 21MA7IECGT |
| :--- | :--- | :--- | :--- |
| Credits | $\mathbf{0 3}$ | L-T - P | $\mathbf{3 - 0 - 0}$ |
| Contact hours | $\mathbf{3 9}$ hours |  |  |

Course Objectives: The objective of the course is to introduce the concepts in graph Theory, with a sense of algorithms and some modern applications. They will be able to use these methods in subsequent courses in the design and analysis of algorithms, computability theory, software engineering, and computer systems.

## UNIT-1

## GRAPHS AND DIGRAPHS

[8 hours]
Fundamentals of graphs and digraphs, modelling using graphs and digraphs, graph search - BFS, DFS. The shortest path algorithms: Dijkstra algorithm, Bellman Ford algorithm. Minimum weight spanning tree: Kruskal's algorithm and Prim's algorithms. Applications: Job sequencing problems, designing an efficient computer drum, making a road system one-way.

## UNIT-2

## EULERIAN AND HAMILTONIAN GRAPHS

[7 hours]
Transportation Problems: Eulerian graphs, Fleury's algorithm, Chinese Postman Problem, Hamiltonian cycles, Travelling Salesman Problem, applications.

## UNIT-3

## CONNECTIVITY

[8 hours]
Vertex and edge connectivity, separable graphs, block graphs, k-connected graphs, maximum flow Problem, Ford-Fulkerson algorithm, Min Cut - Max Flow theorem, Maximum Flow of Minimum Cost, feasible flows. Construction of reliable communication networks-The minimum connector problem, enumeration of chemical molecules and electrical networks.

## UNIT-4

## COVERING AND MATCHING

[8 hours]
Vertex and edge covering, vertex and edge independence, matchings, perfect matchings, maximum matching, Hall's theorem, augmenting path, Edmond's algorithm, maximal independent sets, König's Min-Max theorem, Gale-Shapley Algorithm, Minimum path cover, Friend's strangers problem.

## UNIT-5

## COLORABILITY

[8 hours]
Vertex colouring, Chromatic Number, Bi-chromatic, Edge coloring and its applications to timetabling and sport scheduling, Vizing's theorem, Sequential coloring algorithm, map coloring, Four Color problem, chromatic polynomial. König's theorem, Applications: Scheduling examinations, Frequency assignments, Index registers.

## BMS COLLEGE OF ENGINEERING, BENGALURU-19

Autonomous Institute, Affiliated to VTU
DEPARTMENT OF MATHEMATICS

## Text Books

1. Narsing Deo, Graph Theory, PHI, 2014.
2. Geir Agnarsson \& Raymond Greenlaw Pearson, Graph Theory, modelling, applications and algorithms, Prentice Hall, 2007.

## Reference Books

1. Frank Harary, Graph Theory, Addison Wesley, Reading, Massachussets, 1969.
2. Jonathan L. Gross, Jay Yellen, Graph Theory and its Applications, $2^{\text {nd }}$ Edition, CRC Press LLC, Florida, 2000.
3. Gary Chartrand and Ping Zhang, Introduction to Graph Theory, McGraw Hill, 2005.

At the end of the course the students will be able to

| CO | Course Outcomes | PO's |
| :---: | :--- | :---: |
| CO-1 | Demonstrate an understanding of the fundamental <br> concepts of graph theory, digraphs, trees, finding <br> Paths and cycles, weighted graphs matching and <br> graph coloring. | $\mathbf{1 , 2}$ |
| CO-2 | Apply appropriate graph algorithms to solve <br> problems involving transportation, connection, <br> social networking and scheduling. | $\mathbf{1 , 2}$ |
| CO-3 | Analyse the algorithms to find the shortest path, <br> maximum flow of minimum cost, maximum <br> matching and minimum path cover. | $\mathbf{2}$ |
| CO-4 | Use of MATLAB to find the shortest path, <br> minimum weighted spanning tree, maximum flow. | $\mathbf{5}$ |

## Question Paper Pattern

- Each unit consists of one full question.
- Five full question to be answered.
- Internal choice in Unit 1 and Unit 5.

## SEVENTH SEMESTER-INSTITUTIONAL ELECTIVE

| Course Title | NUMBER THEORY | Course Code | 21MA7IENMT |
| :--- | :--- | :---: | :---: |
| Credits | $\mathbf{0 3}$ | L- T - P | $\mathbf{3 - 0}-\mathbf{0}$ |
| Contact hours | $\mathbf{3 9}$ hours |  |  |

Course Objectives: The course is a graduate level introduction Number Theory in which, it will cover fundamentals of the subject. It has contributed to many practical problems such as Coding Theory, Cryptography in modern information technology.

## UNIT-1

## CONGRUENCES:

[09 hours]
Introduction, Congruences and Equivalence Relations, Linear Congruences, Linear Diophantine Equations and the Chinese Remainder Theorem, Modular Arithmetic: Fermat's Theorem, Wilson's Theorem and Fermat Numbers. Polynomial congruences, Pythagorean equations.

## UNIT-2

## ARITHMETIC FUNCTIONS:

[07 hours]
Introduction, Sigma Function, Tau Function, Dirichlet Product, Dirichlet Inverse, Moebius Function, Euler's Function, Euler's Theorem, An application to Algebra.

UNIT-3
PRIMITIVE ROOTS AND INDICES:
[07 hours]
The order of a positive integer, primality tests, primitive roots for primes, the algebra of indices.

UNIT-4
QUADRATIC CONGRUENCE AND CONTINUED FRACTION:
[09 hours]
Legendre symbol, Quadratic reciprocity, the Jacobi symbol, finite continued fractions, infinite continued fractions.

## UNIT-5

NON LINER DIOPHANTINE EQUATIONS:
[07 hours]
Pythagorean triangles, Fermat's last theorem, Sum of Squares, Pell's equation, Mordell's equation.

Autonomous Institute, Affiliated to VTU
DEPARTMENT OF MATHEMATICS
On completion of the course, student will have the ability to:

| CO No | Course Outcomes | PO |
| :---: | :--- | :---: |
| 1 | Apply the concept of congruence to compute system of equations (algebraic <br> equations) | 1 |
| 2 | Demonstrate an understanding towards the nature of different functions | 1 |
| 3 | Demonstrate an understanding primitive roots and indices | 1 |
| 4 | Apply concept of quadratic congruence to evaluate quadratic residues and <br> understand continued fractions. | 1 |
| 5 | Demonstrate an understanding with some important non-linear Diophantine <br> equation. | 1 |

## Text Books:

5. Elementary number theory with Applications-2 ${ }^{\text {nd }}$ Edition-Thomas Koshy 2009.
6. Beginning Number Theory by Neville Robbins-2 ${ }^{\text {nd }}$ Edition-Jones and Barlett Publ.-2006.

## Reference Books:

4. Elementary Number Theory by David M Burton - Tata McGraw Hill Publ.-6th Edition 2006.
5. Elementary Number Theory by Gareth A. Jones and Josephine Mary Jones - Springer-1998.

## Question Paper Pattern:

- Each unit consists of one full question.
- Each full question consists of two, three or four subdivisions.
- Five full question to be answered.
- Internal choice in Unit 1 and Unit 4.
---------------------

# EIGHTH SEMESTER - INTITUTIONAL ELECTIVE - (Except CSE/ISE Branch) 

| Course Title | Linear Algebra | Course Code | 21MA8IELIA |
| :--- | :--- | :--- | :--- |
| Credits | $\mathbf{0 3}$ | L-T T P | $\mathbf{3 - 0}-\mathbf{0}$ |
| Contact hours | $\mathbf{3 6}$ hours |  |  |

Prerequisites: Vector Algebra, Matrix theory, Calculus, Geometry, Group Theory.
Course Objectives: To provide the students with a foundation of concepts in linear algebra that is essential to engineers of computer and information science.

UNIT-1
[7 hours]
VECTOR SPACES
Vector spaces, Subspaces, Linear Combinations, Linear Spans, row space and column space of a Matrix, Linear Dependence and Independence, Basis and Dimension, Coordinates.

UNIT-2

## LINEAR TRANSFORMATIONS

[7 hours]
Introduction, Linear Mappings, Geometric linear transformation of $\mathbb{R}$, Kernel and Image of a linear transformations, Matrix representation of linear transformations, Rank-Nullity Theorem(No proof), Singular and Nonsingular linear transformations, Invertible linear transformations.

## UNIT-3

EIGENVALUES AND EIGENVECTORS
[8 hours]
Introduction, polynomials of matrices, characteristic polynomial, Cayley-Hamilton theorem, eigenvalues and eigenvectors, eigen spaces of a linear transformation, diagonalization, minimal polynomial, characteristic and minimal polynomials of block matrices, Jordan canonical form.

## UNIT-4

INNER PRODUCT SPACES
[7 hours]
Inner product, inner product spaces, length and orthogonality, orthogonal sets and Bases, projections, Gram-Schmidt process, QR-factorization, least squares problem and least square error.

## UNIT-5

SYMMETRIC MATRICES AND QUADRATIC FORMS
[7 hours]
Diagonalization of real symmetric matrices, Orthogonal diagonalization of real symmetric matrices, quadratic forms and its classifications, Singular value decomposition.

## BMS COLLEGE OF ENGINEERING, BENGALURU-19

Autonomous Institute, Affiliated to VTU
DEPARTMENT OF MATHEMATICS

On completion of the course, student will have the ability to:

| Course Code | CO \# | Course Outcome (CO) | PO |
| :---: | :---: | :--- | :---: |
| 21MA8IELIA | CO 1 | Apply the concepts of Matrices to Vectors spaces. |  |
|  | CO 2 | Relate the concepts of Eigen values, Eigen vectors <br> \& functions to linear algebra. | 1 |
|  | CO 3 | Apply the concepts of inner products. |  |

## Text Books:

3. Linear Algebra and its applications, David C. lay, Steven R. lay, Judi J Mc. Donald, $5^{\text {th }}$ Edition, 2015, Pearson Education.
4. Linear Algebra and its applications, Gilbert Strang, $4^{\text {th }}$ edition, 2005, Brooks Cole.

## Reference Books:

3. Schaum's outline series-Theory and problems of linear algebra, Seymour Lipschutz, $5^{\text {th }}$ edition, 2012, McGraw-Hill Education.
4. Linear Algebra an Introduction, Richard Bronson \& Gabriel B. Costa, $2^{\text {nd }}$ edition.

3. https://www.coursera.org/learn/linear-algebra-machine-learning
4. https://nptel.ac.in/syllabus/111106051/

## Question Paper Pattern:

3. Five full questions to be answered.
4. To set one question each in Units 1, 2, 5 and two questions each in Unit 3 and Unit 4.

# B.M.S. COLLEGE OF ENGINEERING, BENGALURU-19 <br> Autonomous Institute, Affiliated to VTU, Belagavi <br> DEPARTMENT OF MATHEMATICS AND HUMANITIES 

## SYLLABUS (2022-2023)

FIRST SEMESTER B.E.

| Course Title | Communicative English | Course Code | 22MA1AECEN |
| :--- | :--- | :--- | :--- |
| Credits | 01 | L - T - P | $1: 0: 0$ |

## Course Objectives:

- To understand the nuances of phonetics, accent, intonation and improve the pronunciation and communication skills
- To learn the basic English grammar and understand all types of English vocabulary and acquire professional communication skills
- Perform as a member of a team and engage in group discussion and oral presentation.

## Teaching-Learning Process (General Instructions):

The strategies teacher can use to accelerate the attainment of the various course outcomes and make Teaching -Learning more effective:
Teachers shall adopt suitable pedagogy for effective teaching - learning process. The pedagogyshall involve the combination of different methodologies which suit modern technological tools and software's to meet the present requirements of the Global employment market.
(i) Direct instructional method (Low/Old Technology), (ii) Flipped classrooms (High/advanced Technological tools), (iii) Blendedlearning (Combination of both), (iv) Enquiry and evaluation-based learning, (v) Personalized learning, (vi) Problems based learning through discussion, (vii) Following the method of expeditionary learningTools and techniques, (viii) Use of audio-visual methods through language Labs in teaching of LSRW skills.
Apart from conventional lecture methods, various types of innovative teaching techniques through videos, animation films may be adapted so that the delivered lesson can progress the students in theoretical applied and practical skills in teaching of communicative skills in general.

| UNIT - 1 | [03 hours] |
| :--- | :---: |

SYLLABUS (2022-2023)
SECOND SEMESTER B.E.

| Course Title | Professional Writing Skills in English | Course Code | 22MA2AEPWE |
| :---: | :---: | :---: | :---: |
| Credits | 01 | L-T - P | $1: 0: 0$ |

## Course Obiectives:

- To understand and identify the common errors in writing and speaking
- Developing listening and speaking skills through classroom activities based on listening comprehension, recapitulation, interpretation and debate on the same
- To read technical proposals and write good technical reports, to acquire better analytical skills and methodology required for writing projects and research papers.
- Perform as a member of a team and engage in group presentation.

## Teaching-Learning Process (General Instructions):

The strategies teacher can use to accelerate the attainment of the various course outcomes and make Teaching -Learning more effective:
Teachers shall adopt suitable pedagogy for effective teaching - learning process. The pedagogyshall involve the combination of different methodologies which suit modern technological tools and software's to meet the present requirements of the Global employment market.
(i) Direct instructional method (Low/Old Technology), (ii) Flipped classrooms (High/advanced Technological tools), (iii) Blended learning (Combination of both), (iv) Enquiry and evaluation-based learning, (v) Personalized learning, (vi) Problems based learning through discussion, (vii) Following the method of expeditionary learning Tools and techniques, (viii) Use of audio-visual methods through language Labs in teaching of LSRW skills.
Apart from conventional lecture methods, various types of innovative teaching techniques through videos, animation films may be adapted so that the delivered lesson can progress the students in theoretical applied and practical skills in teaching of communicative skills in general.

## UNIT - 1

[03 hours]
Identifying Common Errors in Writing and Speaking English: Common errors identification in parts of speech, Use of verbs and phrasal verbs, Auxiliary verbs and their forms, Subject Verb Agreement (Concord Rules), Common errors in Subject-verb agreement, Sequence of Tenses and errors identification in Tenses. Words Confused/Misused. Analogy of Comparison

# BMS COLLEGE OF ENGINEERING, BENGALURU-19 <br> Autonomous Institute, Affiliated to VTU <br> DEPARTMENT OF MATHEMATICS AND HUMANITIES 

SYLLABUS (2022-2023)

| Course Title | Constitution of India and <br> Professional Ethics | Course Code | 22MA1HSCIP / <br> 22MA2HSCIP |
| :--- | :--- | :--- | :--- |
| Credits | 01 | L-T-P-S | $\mathbf{1 - 0 - 0 - 0}$ |

Total Hours: 15

## Course objectives:

The course Constitution of India and Professional Ethics (22MA1HSCIP/22MA2HSCIP) will enable the students,

- To educate students about the country's highest law.
- To be familiar with the political system and practices of both state and the central government.
- To know about the risk, workplace safety and to understand issues related to the profession.

## Teaching-Learning Process

These are sample strategies, which teachers can use to accelerate the attainment of the various course outcomes.

- Innovative lecture methodologies to be adapted to improve the teaching and learning process.
- Short videos for better understanding and group discussion.
- Encourage collaborative (Group Learning) learning in the class.
- Ask Higher Order Thinking (HOT) questions in the class, which promotes critical thinking.
- Classroom discussions focused on case studies help students strengthen their analytical skills and thinking abilities, such as the capacity to assess, generalise, and analyse knowledge rather than just recollect it.

UNIT-1
[03 hours]

## Introduction to Indian Constitution

Indian Constitution: Introduction and Necessity of the Indian constitution, Making of the Constitution, Role of the Constituent Assembly. Preamble and Salient features of the Constitution of India, Fundamental Rights and its limitations.

> | Teaching-Learning Process | Chalk and talk method / Power Point Presentation |
| :--- | :--- |

## UNIT -2

[03 hours]

## Fundamental Duties and Directive Principles of State Policy

Fundamental Duties and their significance. Directive Principles of State Policy: Importance and its relevance. Case Studies.

```
Teaching-Learning Process Chalk and talk method / Power Point Presentation
```

## Assessment Details (both CIE and SEE)

| CREDITS | 00 | L-T -P | $\mathbf{1 - 0}-\mathbf{0}$ |
| CONTACT HOURS | 12 Hours |  |  |

## Course Objectives:

1.To impart basic English grammar and essentials of language skills
2. To train to identify the nuances of phonetics, intonation and enhance pronunciation skills
3.Toenhance with English vocabulary and language proficiency

## UNIT -I

## COMMUNICATION:

- Introduction- Role and Importance of English in the Corporate World.
- Communication-Importance of technical communication-levels, flow of organizational communication
- Effective Presentation strategies: non-verbal communication aspects, Preparing Power Point Presentation
- Public Speaking
- Listening-Types, traits and importance of listening
- Telephone Etiquette
- Interviews-types and preparation.
- InterpersonalCommunication Skills -Group Discussion

## Additional Reference:

- Communication: Organizational communication, Communication cycle, Barriers
- Language as a tool of communication, characteristics of language
- Non-verbal communication
- Power point presentations
- Traits of a good listener, barriers
- Interviews: questions frequently asked
- Business Meetings/Conferences: Spoken
- Effective reading skills

## UNIT -II

## Technical Writing / Speaking: Specific Focus

- Letter Writing -Job Applications, E-mails and other Official Letters
- Writing a résumé
- Writing reports and dissertation/thesis-structure and significance
- Description of Graphics -kinds, construction, use and application (in scientific texts) and Interpretation

## Additional Reference:

- Paragraph Writing, Expansion of ideas - Précis Writing
- Business Letters: Significance, purpose, structure, layout, types and samples
- Curriculum Vitae/ résumé/bio-data-different formats

# BMS COLLEGE OF ENGINEERING, BENGALURU-19 

Autonomous Institute, Affiliated to VTU

- Technical Reports: objectives, characteristics and categories
- Manuscript format, prefatory parts and main text
- Interpretation of the diagrams and graphs in paragraphs
- Structure of a Research dissertation/thesis.

## UNIT -III

## Grammar: Basics and Structures

- Parts of Speech-in brief
- Transformation of Sentences, Active and Passive Voice, Direct and Indirect Speech.
- Subject-Verb Agreement

## Additional Reference:

- Nouns, Pronouns, Tenses, Articles and Prepositions. Adjectives, Conjunctions, Adverbs, Interjection
- Degrees of comparison
- Punctuation
- Types of sentences
- Simple-compound and complex sentences
- Rules governing Active-Passive voice and Direct-Indirect Speech
- Singular and plural nouns and verbs.

UNIT -IV

## Vocabulary

- Correct pronunciation of important words
- Identifying errors in sentences-often mispronounced and misspelt word
- Difference between American and British English,
- Indianism-Mother tongue influence
- Using Idioms and phrases -words commonly misused and confused
- Analogy of Comparison
- Corporate/conventional idioms.

## Additional Reference:

- IPA script chart to read sounds-vowels and consonants
- Spellings chart
- Words often mispronounced $\backslash$
- Homophones and homonyms
- American English- evolution, expressions and slangs
- How American English has influenced corporate world
- Indianized expressions in English
- phrasal verbs and proverbs.

## Text Book:

1. Practice and Perfect- a workbook issued by the Department of Mathematics and Humanities, BMS College of Engineering.
2. Additional Reference Source prepared by the Faculty of English-issued by the Department of Mathematics and Humanities, BMSCE.

## Reference Books:

3. IELTS Preparation and Practice by Wendy Sahanaya and Terry Hughes, OUP, 2007.
4. Technical Communication; Principles and Practice - Meenakshi Raman and Sangeetha Sharma.
5. English for Presentations by Marion Grussendorf, OUP, 2015
6. Making Sense of English, M.Yadugiri, Viva Publications
7. Advanced English Grammar - Thomson and Martinet, Cambridge University Press.

## Course Outcomes:
