Important mainly because it was sent directly to you.

This is the only acknowledgement mail which the organization agreed to send after many requests. And they stated that the certificate will be provided only after the completion of the project (within 3 weeks)
The project was planned for three months, and I have completed 8 weeks of internship in this organization till now.

Internship Completion Letter

3rd March 2021

To,

SHAMAN S M,
BMS College of Engineering, Basavanagudi, Bengaluru

Subject: Internship completion letter on “Faecal Sludge Treatment and Management” and Hygiene Practices in Devanahalli.

Dear Sir,

Greetings from CDD Society, Bengaluru

This is with reference to the aforementioned subject – CDD Society’s has built FSTP under CSR project in Devanahalli. CDD society had provided internship based on “Faecal Sludge Treatment and Management”, this project is a management system to safely collect, transport and treat faecal sludge from pit latrines, septic tanks or other onsite sanitation facilities.

The main objectives of the training were to create awareness and behavioral change across the FSM value chain and to reuse the bi-products obtained by the faecal waste for various organic farming. In 4 weeks period Mr. Shaman was involved in FSTP Management and Hygiene Practice training for Puorakarmikas at Devanahalli.

The training programs outcomes are below mentioned topics:

- To ensure efficient treatment of faecal sludge being generated in the town of Devanahalli.
- To ensure safe reuse of treatment by products and hygiene practices in Devanahalli.
- To demonstrate possible financial models for FSTP operation.

It's our pleasure to associate with you on the key issue of FSM treatment and Management related waste management and hygiene practices. This was an interactive internship which was conducted from 04/01/2021 to 28/01/2021, under the guidance of Senior Project Engineer YOGISH.L at our FSTP implement on ground plant at Devanahalli.

Thanking you.

Yours Sincerely,

Rohini P

1st May 2021

Dear Candidate,

On behalf of Teach For India, I am excited to extend an offer letter to you for an Volunteering internship position within our Govind Nagar Classroom. This position is located in Mumbai, Maharashtra. The position is for Volunteering in our classroom.

This position is scheduled to begin 3rd May,2021 and will be a minimum one month unpaid internship opportunity. The schedule for this position is 1 month and minimum 60 hours during the period. In this role, you will report directly to Gayatri Mhetre . This offer is contingent upon the successful completion of all your roles and responsibilities during this period.

We look forward to having you begin your career at Teach For India and wish you a successful internship. Welcome to our team!

Sincerely,

Gayatri Mhetre

AI Based Feature Extraction Through Content Based Image Retrieval

C. Gururaj^{1,*} and Satish Tunga²

¹Department of Electronics and Telecommunication, BMS College of Engineering, Bengaluru, India

²Department of Electronics and Telecommunication, RIT, Bengaluru, India

Therapeutic pictures are progressively being utilized inside human services for conclusion, arranging treatment, controlling treatment and checking sickness movement. In reality, helpful imaging prevalently shapes vague, missing, dubious, essential, clashing, dull restricting, contorted data additionally, information has a strong fundamental character. The proposed approach can be used to achieve the accuracy by using the artificial intelligence techniques wherein the disease level is identified by comparing it with the artificial intelligence data. The two fold merit of this system is it provides better accuracy and also determines all the possibilities of spreading of the disease including the various stages of the disease. This research work also represents new automated strategies of the division and arrangement of therapeutic pictures utilizing computerized reasoning, i.e., delicate processing strategies, data combination and particular area information. Promising out- comes demonstrate the predominance of the delicate processing and information based approach over best customary systems as far as division mistakes. The arrangement of various structures is made by executing rules obtained by both space literature and by medical experts.

Keywords: Content Based Image Retrieval, Artificial Intelligence, Feature Extraction, Machine Learning.

1. INTRODUCTION

As a general approach, the appreciation of any photo incorporates the planning of features removed from the photo with pre-secured models. The formation of an anomalous state significant model requires the depiction of data about the articles to be illustrated, their associations, and how and when to use the information set away inside the model. Counterfeit consciousness has shown to yield promising results in automated picture dealing with and examination while missing, obscure or ruined data is open. Likewise, for biomedical picture examination the fundamental nature of data may adequately be moved nearer by implementing strategies for A.I.: Data dependent Frame- works, Master Frameworks, Choice Emotionally supportive networks, Neural Frameworks, Fluffy Rationale and Frameworks, NeuroFluffy Frameworks, Transformative and Innate Calculations, Information Mining, Learning Revelation, Semantic Nets, Symbolic Math for data depiction, et cetera. The data mix methods adequately clarify the aggregation of numerical and etymological information, and can adjust to faulty, uncertain, conflicting, basic, free and abundance

information, like that event in biomedical imaging space, remembering the ultimate objective to give a more correct and less unverifiable explanation.

The process of querying similar images using an image as the input is termed as “Content Based Image Retrieval” (CBIR). According to Ref. [1], Content Based Image Retrieval (CBIR) methods utilize features like color, texture and shape to extract the image. The images are divided into several regions before the extraction of their features. The feature vector of each image in the database is compared with that of the query image and is labelled as positive if at least one of the regions is in close proximity with the features of the query image; else the image is designated as negative. This process of labelling the images as ‘positive’ or ‘negative’ is referred as Multiple-Instance Learning (MIL).

In the present human administrations, imaging accept a fundamental part all through the entire clinical process from diagnostics and treatment planning to careful philosophy and follow up considers. Since most imaging modalities have gone particularly progressed, with continually growing assurance, restorative picture taking care of necessities to go up against the challenges rising up out of broad data volumes (I) remedial picture organization and

* Author to whom correspondence should be addressed.

picture data mining, (ii) bio imaging, (iii) virtual reality in helpful discernments and (iv) neuroimaging. The specific enormous multifaceted nature in therapeutic imaging relies upon huge measures of data, tremendous learning bases, lack, imprecision, uproar, inconsistency in data and taking in (an unmistakable requirement for good models in various districts of remedy), abundance, distinctive strategies for considering, including subjective reasoning, heuristics, and subjective reasoning. The primary test in the medicinal picture preparing is to accomplish the precision of any malady, when the exactness of the ailment is nearly known it will be useful.

2. LITERATURE REVIEW

Figuring are requested by their essential methodologies, to be particular the ones in light of edges, the ones in perspective of collection frameworks and the ones in light of deformable models [2]. The continued going form is based on account of the raised examinations concerning the deformable models that have been done over the latest couple of decades. Average counts of every kind are discussed and the rule considerations, application fields, central focuses and injuries of each sort are compacted. Tests that apply these estimations to divide the organs and tissues of the female pelvic pit are shown to furthermore lay-out their unmistakable qualities. Finally, the major decides that should be considered for arranging the division counts of the pelvic cavity are proposed.

This Handbook [3] is relied upon to fill in as the principle reference point on picture and video getting ready, in the field, in the investigation look into office, and in the classroom. Each part has been formed through correctly picked, perceived pros having some mastery in that subject ensuring that the best significance of cognizance be bestowed to the pursuer. Extension consolidates essential, widely appealing and pushed subjects and everything considered, this book serves correspondingly well as class-room course perusing as reference resource.

Present a substance based picture recuperation system that sponsorships essential authority in clinical pathology [4]. The photo guided decision sincerely steady system discovers, recuperates, and demonstrates cases which show morphological profiles solid to the case being alluded to. It uses a photo database containing 261 digitized illustrations which have a place with three classes of lymph proliferative messes and a class of sound leukocytes. The faithful nature of the central module, the snappy shading partitioned, makes possible unsupervised on-line examination of the inquiry picture and extraction of the features of premium: shape, an area, and surface of the centre. The nuclear shape is portrayed through equivalence invariant Fourier descriptors, while the surface examination relies upon a multi assurance synchronous autoregressive model. The structure execution was assessed through ten times

cross-endorsed course of action and differentiated and that of a human ace.

This work [5] presents new automated methodologies of the division and game-plan of remedial pictures utilizing delicate enlisting systems (e.g., padded legitimization, neural structures, acquired figuring), data blend and particular space learning. Warm strategy for thinking goes about as a unified structure for tending to and preparing both numerical and delegate data ("hybridization"), and further- more fundamental data constituted essentially by spatial relationship in biomedical imaging.

This work [6] segment includes the possibility of a cushy set, which deals with the depiction of classes whose breaking points are not precisely chosen. It uses a trademark work, taking characteristics as a general rule meanwhile. It may moreover be a restricted or denumerable game plan of straightforwardly asked for levels. Together, feathery sets and credibility theory offer a structure to oversee predicates whose satisfaction include degree and with modalities imparting weakness well ordered. Credibility measures and need measures are non-added substance set limits; the past are max-decomposable for disjunction and the last are min-decomposable for conjunction. Fleecy sets can be deciphered in different ways. Content Based Image Retrieval (CBIR) [7] is the process of querying images from large databases using image content rather than metadata. The input to the CBIR may be a keywords or an image, and the query run is capable of acquiring images similar to the supplied input. CBIR is slowly expanding and is finding applications in several domains. The attractiveness of CBIR is that labelling large sets of images takes proportionate effort and time [8].

A system that can acquire related images without using these labels poses a striking solution.

3. SYSTEM DESIGN AND IMPLEMENTATION

This assignment represents new automated techniques for the division and depiction of medicinal pictures utilizing manufactured scholarly ability, i.e., touchy figuring structures (e.g., padded premise and hereditary estimations), data blend and particular domain learning. Padded defense goes about as an assembled system for tending to and preparing both numerical and emblematic data ("hybridization") and besides basic data constituted for the most part by spatial relationship in biomedical imaging. The depiction of various biological structures is made by acknowledging orders obtained both by space creating and by helpful experts. Despite the way that the explained levelheadedness has been finished and enough utilized for demonstrate extracted in the region of therapeutic imaging, the sent frameworks are nonspecific and noteworthy to any function that can be depicted by known information and philological picture examination.

The use of feathery reason and semantic learning for edge area and division of alluring resonance photos of the

Fig. 1. Overall system design.

cerebrum showed the commonness of the learning based approach over best standard strategies as far as division bungles. The proposed system livelihoods:

- A fleecy data based shape acknowledgment system;
- A semantic net for addressing space learning;
- Effective shape area by means of looking for of a perfect route between two known motivations behind the frame that upgrades a cost work, by strategies for an extensive-ness first outline look system known reasons for the shape that advances a cost work, by techniques for a broadness first chart look.
- Picture division is a champion among the most crucial advances provoking the examination of mechanized pictures, its central goal being to isolate a photo into disjoint parts that have a strong association with articles or zones of this present reality.

The compositional setup strategy is stressed over working up an essential thing system for a structure. It con- solidates seeing the certified parts of the framework and exchanges between these areas. The beginning plan arrangement of seeing these subsystems and working up a structure for subsystem control and correspondence is called advancement exhibiting format and the yield of this system approach is a portrayal of the thing fundamental orchestrating. The proposed outline for this system is as

shown in Figure 1. It exhibits the way this structure is delineated and brief working of the system.

Framework configuration describes the designing of the segments of a structure, for now the plan, units and portions, the particular intersections of those sections and the data that runs that system. It is done to fulfil the necessities and requirements of the structure in order to achieve the mindful and well performing structure.

Illumination variations are handled using mean subtracted color planes. Each patch provides features such as color, texture, local gradient and morphology. Different methodologies such as Granulometry, Color histogram [9], Local Binary patterns (LBP), histogram of Laplacian of Gaussian (LoG) and Histogram of oriented Gradients (HoG) are used in the proposed technique.

4. RESULTS

The general structure of the proposed framework included three stages. The fundamental propel tends to the extraction of the basic highlights to depict every particular class from the named X-beam picture modalities. Second step included passing on the longing appear by utilizing the expelled highlights to arranging unmistakable machine learning (ML) systems. At last, the last advance included looking over the execution of every classifier by discovering the exactness of each class openly and moreover

Fig. 2. Extracting the regions.

for the general framework want in light of the blueprint undertaking, it was proposed to bind the gave dataset into three parties (classes), in context of the survival time:

(1) decisively survivors for under ten months, (2) mid-term survivors for a degree of ten to fifteen months, and (3) entire arrangement survivors for over fifteen months.

Loading the data for region extraction from the menu of the load data for region extraction. The images of the brain tumour of various types are considered as the data input for the extraction of the region. In this the preloaded expert knowledge extracts the region of the tumour from the given data input.

Figure 2 shows the process of extracting the region of the tumour from the menu of the extract region. This process of extraction is done by segmentation of the data input. It gives a boundary of the Tumour region where may be the tumour located.

Figure 3 shows extracting the maximum likely hood region that is it extracts the similar data to the tumour image data to identify the region with accuracy. Extracting the maximum likely hood region is to compare the input tumour data to the similar region without

Fig. 3. Extracting maximum likely hood region.

Fig. 4. Detecting the tumour from the image.

Fig. 5. Training image.

tumour. This maximum likely hood region is preloaded by the expert knowledge for comparison. Figure 4 indicates the process of detecting the tumour from the image.

Figure 5 indicates the training images are the possibilities of the spreading of the tumour in all the possible directions. There are around forty eight images in which all possibilities the tumour image can spread, this training images can help the user to identify the next stage of the tumour in which direction. Figure 6 indicates the RF

Fig. 6. RF classifier image.

5. CONCLUSION

Counterfeit consciousness has shown to yield promising results in automated picture dealing with and examination while missing, obscure or ruined data is open. Likewise, for biomedical picture examination the fundamental nature of data may adequately be moved nearer by implementing strategies for A.I.: Data dependent Frame-works, Master Frameworks, Choice Emotionally supportive networks, Neural Frameworks, Fluffy Rationale and Frameworks, NeuroFluffy Frameworks, Transformative and Innate Calculations, Information Mining, Learning Revelation, Semantic Nets, Symbolic Math for data depiction, et cetera. The data mix methods adequately clarify the aggregation of numerical and etymological information, and can adjust to faulty, uncertain, conflicting, basic, free and abundance information, like that event in biomedical imaging space, remembering the ultimate objective to give a more correct and less unverifiable explanation. The proposed approach can be used to achieve the accuracy by using the artificial intelligence techniques that is the disease level can be identified by comparing with the artificial intelligence data with ease. Since it produces the accuracy and even in what all the possibilities of the spreading of the disease and the stage of the disease is also found.

Abstract — Age estimation from speech has recently received enormous interest for its plethora of applications such as personal voice assistants, user-profiling, targeted marketing, call-routing and criminal tracking. There is critical demand for a system that can estimate the age of the speaker quickly and accurately. In this paper we discuss the prediction of age group from speech features using a Multi-Layer Perceptron (MLP) architecture. Features like Mel Frequency Cepstral Coefficients (MFCC), formants, pitch, chroma values etc. are extracted from every speech sample and are then selected using Principal Component Analysis (PCA) and Redundant Feature Elimination (RFE) techniques. The training and testing are done on a repository from the Mozilla Speech database called Common Voice, consisting of around seventy-five thousand speech samples from different age groups. The implemented model gave us a training accuracy of 87.59% and testing accuracy of 85.68%. We have explained the approaches used in the existing solutions and their drawbacks. Having compared the performance from state-of-the-art solutions on this dataset, we have shown that our proposed model provides enhanced age group classification accuracy.

Keywords— Age Prediction, MLP, PCA, RFE, Common Voice

I. INTRODUCTION

Age prediction finds a wide range of use cases in modern human voice interaction systems. Some of its applications include personalized accessories and product suggestions, music and video recommendations, setting up a smart home, minimizing the search for a suspect in a large criminal's database and to obtain statistics of large population using age groups analysis.

Age prediction using speech features is very challenging due to the scarcity of labelled dataset to analyse and study. The intra speaker variations in pitch, formants, tempo, mood and context also adds to the complexity in predicting the age group accurately. Several algorithms have been implemented to predict users age using image processing but minimal progress has been made in predicting age using only voice analysis.

II. PRIOR WORK

A. Related Works

There are two major approaches in age prediction, namely- age estimation and age classification. Regression based methods are used in age estimation using i-vectors [1]. Even though i-vectors show significance performance of age estimation, the method is highly susceptible for variation of utterance duration [2]. Specifically, the method shows performance degradation as the utterances length decreases especially for samples shorter than 20 seconds. Analysing effect of language change between train and test datasets also shows decrease in performance of the age estimation system. Moreover, i-vectors are computed using a point-estimate that has a very large variance when the amount of data used to compute it decreases and quickly degrades its robustness.

GMM-HMM models have also been used to predict age groups using speech features [3]. When the dataset is divided into 4 age groups (children, young, middle, and senior), the accuracy is found to be good. But when the age groups are increased, the performance of the GMM-HMM model significantly decreases.

Many other classifications models have also been used to predict age groups using voice features [4]. The results obtained from analysis of pitch relation to age shows that pitch value decreases with age. Factors that limits the recognition system is the inability to identify features that are sensitive and strong enough to accommodate differences in speaker articulation, prosody variations and differences in sound channels across all age groups [5].

B. Motivations and Goal

To solve the above-mentioned challenges, in this paper, we elaborate our approach of building an age classification system by using MFCC features [6], along with other important voice features like Fundamental Frequency, Spectral Energy Coefficients, Spectral Centroids in each frame, Interquartile Ranges etc. as mentioned in [7]. To identify key features from the above extracted set, we have used PCA and RFE techniques. To learn these features for age

group classification, we have used an MLP model. By adding novelty in steps such as pre-processing, feature selection using PCA and hyper parameter tuning in the MLP architecture, we are able to achieve higher accuracy scores than the currently existing state of the art solutions.

The rest of this paper is organized as follows; Section III describes the methodology of the proposed age prediction system; Section IV discusses the results and finally the paper is concluded in Section V.

III. METHODOLOGY

This section deals with the overall methodology used in the proposed age prediction system. Fig.1 shows the block diagram, which depicts the various stages involved in the proposed age prediction model using speech features.

Fig. 1. Block diagram of the proposed age prediction system

A. Database

We have used the data from Mozilla Speech Database called as Common Voice dataset [8]. It is consisting of around seventy-five thousand speech samples from different age groups, genders (male, female and other) from various geographical areas, with unique lingual dialects and accents. This dataset is widely used for Automatic Speech Recognition (ASR) systems. The age group labels in the corpus are - teens (<19), twenties (19-29), thirties (30-39), forties (40-49), fifties (50-59), sixties (60-69), seventies (70-79) and eighties (80-89). These labels were One-hot encoded to convert them from categorical type variable to integer values, for the purpose of model training.

Fig. 2 shows the dataset distribution. Prior art solution [3] has used 4 categories (Child, Young, Middle and Senior) with GMM-HMM model approach. However, its accuracy is found to be less with expansion to 8 age groups due to lesser available labelled data for seventies and eighties age groups. By using MLP, with our proposed processing steps, we are able to get better accuracy results for all the age groups.

Fig. 2. Histogram of voice samples in different age groups

B. Pre Processing

From the Common Voice repository, only filename and age of the speaker labels are used. Other labels such as gender, spoken text and sample ID were removed. Data cleaning was done to reduce feature dimensions and prevent overfitting.

C. Features Extraction and Selection

Following the pre-processing stage, we moved on to feature extraction from the accumulated samples. Open-source python libraries like Pyaudioanalysis and Librosa were used to extract features from the audio samples. Features like Mel Frequency Cepstral Coefficients (MFCC), spectral centroid, zero-crossing rate, entropy, roll off, flux and chroma values of the signal were extracted at discrete instances of time. The Sampling rate was set to 22 kHz and Hamming window was used with a time frame of 20 ms and 50% signal overlap. Since each audio feature is extracted at a particular instant of time, we compute them in intervals and take the mean, median, standard deviation, minimum and maximum values from the features extracted. All these parameters are extracted because MFCC's alone cannot determine the uniqueness of a person's vocal tract system [9], correlating it with their age group. The script extracts 34 audio features and with the 5 statistics taken, a total of 170 features were extracted from each audio sample.

When the model was trained with all the 170 extracted features, the model over fitted to the test dataset and produced an accuracy score of 78%. To avoid overfitting, feature space dimensionality is needed to be reduced by eliminating unweighted vectors from the feature set. To reduce the feature set dimension, we used L1 regularization with Principal Component Analysis (PCA) [10] and Redundant Feature Elimination (RFE) techniques [11].

$$Loss = Error(y, \hat{y}) + \lambda \sum_{i=1}^N |w_i| \quad (1)$$

Equation (1) represents the loss function for L1 regularization, with y being target labels, $\hat{y}$ as predicted label, w the weights and λ the regularization parameter. Gradient descent was used to obtain a global minima of the cost function using a learning rate of 0.01.

With the PCA algorithm scores, each feature is assigned a value based on their Eigen vector magnitudes, calculated from the respective covariance matrices. With a suitable threshold score, a total of 88 features were selected for training.

Fig. 3. Normalized feature selection scores

From Fig.3, we can see that the MFCC coefficients are among the most contributing features. This is because the envelope of time power spectrum of a speech signal is representative of a person's vocal tract and MFCC accurately represents this envelope. Along with this, the chroma values, spectral energy, entropy and other selected features complement MFCC in representing the complete human speech system, thus helping distinguish between voice samples from people of different age groups.

D. Modelling

With the selected features, different models like XGBoost, SVM, Random forest, GMM-HMM and MLP classifiers were modelled on the same train and test dataset. On analysing the speech detection performance of each of the model, it is found that the MLP produces the highest training and testing accuracy scores [12]. MLP refers to a typical artificial neural network, best described as a network of logistic regression units, in which each feature is assigned a random weight and bias term. The output can be described using a sigmoid function, shown in (2).

$$P = \frac{1}{1 + e^{-(a+bX)}} \quad (2)$$

In (2), 'a' represents the bias term, 'b' represents weight vector (with dimensions $1 \times D$ where 'D' is the number of features, 88 in our case), 'X' represents the vector of samples (with dimensions $D \times N$ where 'N' is the number of samples in the training set, which is approximately 75,000).

Table 1 gives a summary of the implemented MLP architecture. The MLP model was implemented with an input layer having nodes equal to the number of selected features (88) and an output layer equal to the number of predictable age group bins (8). The first, second, third and fourth hidden layers have 256, 1024, 1024 and 256 neurons respectively [13]. Since there are a substantial number of layers and neurons, we needed a high-performance computer to run backpropagation repeatedly in all the layers [14] and hence used the Google Colaboratory for computation.

TABLE I. MLP ARCHITECTURE

Layer number	Layer type	Number of neurons
1	Input layer	88
2	Hidden layer 1 (With dropout)	256
3	Hidden layer 2	1024
4	Hidden layer 3 (With dropout)	1024
5	Hidden layer 4	256
6	Output layer	8

The neural network consists of 1 input, 1 output and 4 hidden layers. An experimentation was done with various hidden layer units to decide upon the final size of the model as shown in Fig. 4.

Fig.4. Effect of number of layers on accuracy

From Fig.5 and Table 1, we see that the input and output layers have 88 and 8 neurons respectively. Further increase in number of neurons in each hidden layer will lead to model over fitting and drastic increase in algorithm run time.

Fig.5. Effect of number of neurons on accuracy

E. Training the Classifier

About 90% of samples from the dataset was used for training the models. Due to the large number of training samples, layers and neurons in the MLP, we used the Google Colaboratory GPUs to run the training. Dropouts were also included in the first and third layers to impart robustness in learning and prevent co-dependency between layers.

Fig.6. Classification accuracies with various Optimizer functions

Fig.6 shows the comparison of classification accuracies with various optimizer functions used in the neural network [15]. Based on comparison results, Adam Optimizer was chosen over classical stochastic gradient descent procedure to update network weights iteratively based on training data. Also, Adam Optimizer maintains a per parameter learning rate that improves performance on problems with sparse gradients and reaps the benefits of both AdaGrad and RMSProp algorithms, which is very apt for this application

Fig.7. Accuracy of classification with respect to activation functions

‘ReLU’ was chosen as the activation function as it is linear for all positive values and zero for all negative values [16]. It converges quickly and does not have the vanishing gradient problem suffered by other activation functions like tanh or sigmoid [17]. It is sparsely activated and since ReLU is zero for negative inputs, it gives a true zero value for the positive range and delivers the best performance as shown in Fig.7

It was observed that a dropout value [15] of 0.2 results in the highest accuracy value as shown in Fig.8. This happens as the layer contribution to activation of downstream neurons

is temporally removed on the forward pass and any weight updates are not applied to the neuron on the backward pass. Hence, the network becomes sparse and less sensitive to specific weights of neurons, which in turn results in a network that is capable of better generalization and less likely to overfit the training data [18]. Along with the MLP, other models like SVM, Random forest, GHMM and XGBoost classifiers were also trained on the same dataset to compare prediction accuracies

Fig.8. Accuracy of classification with respect to dropout values

F. Testing Phase

A subset of 10% of the Common Voice repository was used as the test dataset. Feature extraction was done for all test samples and with the selected features, it was fed into the saved model for prediction. A confusion matrix was created based predicted and true labels to analyze the performance of the selected model. Live samples were also taken to evaluate the prediction accuracy and algorithm run time.

IV. RESULTS

In this section we discuss the results of our model and compare it with other classifiers, tested on the same dataset. Table II shows various evaluation metric scores with respect to different age groups for the selected MLP model. We can observe from the below table that the Precision, Recall and F1 scores are relatively high for all the age groups except for eighties because of the low number of available labelled data compared to other groups.

TABLE II. EVALUATION METRIC SCORES

Age group	Precision	Recall	F1-Score
Teens	0.82	0.73	0.77
Twenties	0.80	0.84	0.82
Thirties	0.81	0.79	0.80
Forties	0.79	0.78	0.79
Fifties	0.87	0.87	0.87
Sixties	0.92	0.91	0.91
Seventies	0.86	0.86	0.86
Eighties	0.75	0.60	0.67
Micro Avg.	0.82	0.82	0.82
Macro Avg.	0.83	0.80	0.81
Weighted Avg.	0.82	0.82	0.82

Fig.9 below shows the normalized confusion matrix obtained from the test dataset. The age groups between twenties and eighties have really high precision score, evident from Table II and confusion matrix. The slightly lower scores obtained for the age groups of teens and eighties is due to the very low number of available labelled speech samples. With the hyperparameter tuning, we have obtained an average classification accuracy of 87.59% using the MLP based model. To further improve the model accuracy, even more labelled voice samples will be needed for training and testing.

Fig.9. Normalized confusion matrix

Fig.10 below shows the comparison of classification accuracy with respect to other models, all trained and tested on the same dataset as mentioned in section D. We can observe that the MLP has highest accuracy score among all and is at least 2.6% more than the state of the art GMM-HMM [3] based model. Our proposed MLP model with variety of speech features learns all age groups, and provides accuracy of 87.59%.

Fig.10 Comparison of different classifier accuracies

V. CONCLUSION

In this paper, the performance and characteristics of a Multi-Layer Perceptron model has been explored in predicting the age group of a speaker. With feature selection and hyperparameter tuning, the prediction accuracy achieved with MLP shows its superiority over other classification algorithms like SVM, Random forest, XGBoost and Gaussian HMM classifiers. Very good performance metric scores have been obtained with eight age categories, which is an improvement over existing solutions in papers [1,2] with i-vectors and paper [3] with GMM-HMM on the same dataset. It is also observed that the proposed model has higher immunity towards language mismatch between training and test dataset and also performs significantly better for shorter utterance length data compared to existing solutions. Hence, we can conclude that the proposed age group prediction from speech features using an MLP model has the best performance for Common Voice Dataset with eight age groups.

An experiment on analysing the accuracy of the proposed model to be conducted in multi-speaker environment. In such cases, the age group prediction accuracy can further be evaluated by means of implementing speaker separation techniques using deep learning [19] in the pre-processing stage so as to enhance model performance. The model accuracy is estimated to improve further by performing voice activity detection [20] and removing silent pauses in all the sample data so as to capture only the necessary speech required for age prediction.

SUBJECT: INTERNSHIP OF ABDULLAH NAYAZ AHMED

This is to certify that above said student of Instrumentation Engineering has underwent internship in our company. This is as per our policy to build confidence in young fresh graduates to work arm-in-arm with our highly efficient and technically skillful technical staff.

He has been shown how various instruments are sold, installed, commissioned and demonstrated to our Customers through our departments like Sales, Marketing and Maintenance during the period between Jan 15 to March 31, 2021.

He has worked with our Sales and Technical personnel both in office and with our Customers (users of Analytical Instruments like GCs, LCs. GCMS, LCMS, AAS, UV, FTIR and general lab equipments like Balance, ovens, Circulating baths etc...).

This exposure must have increased his ability and the drive required to meet his future challenges.

We found his conduct to be good and attentive in learning.

We wish him good for his future.

Thanking you,

Sincerely Yours.

NASSIR AL LAFI

General Manager

Abhilash G

Bangalore

RE: Internship

Dear Abhilash,

I am pleased to offer you an Internship with Infoblox through Flatworld Solutions as a **Software Engineering Intern**. Flatworld Solutions will be your employer of record for the duration of your Internship. The Internship Program will be guided under the Leadership of **Prithish Kamal, Manager, Infrastructure Projects** at Infoblox Technical Support & Software Development Private Limited, Bangalore.

The anticipated start date for your Internship is **January 06, 2021**. The Internship is expected to continue for 6 months depending on the University calendar. Please confirm your end date at least four weeks in advance.

Pay Rate: You will receive a stipend of **INR 25,000** less payroll deductions and all required withholdings, which will be paid monthly in accordance with Flatworld Solutions' normal payroll procedures. The internship will be a 40 hour per week position, with regular hours between 9:00 am to 6:00 pm. The scheduled hours may differ depending on the Infoblox manager's discretion. If you have questions regarding your employment, please contact Sriram K from Flatworld Solutions at sriram.k@pierianservices.com.

At-Will Employment: If you decide to accept the Internship, you should know that your employment with Flat world Solutions and your internship with Infoblox is at-will, which means the employment relationship and your internship can be terminated by any of the parties for any reason, at any time, with or without prior notice and with or without cause. Any statements or representations to the contrary (and, indeed, any statements contradicting any provision in this letter) should be regarded by you as ineffective.

Entire Agreement: This offer letter, once accepted, constitutes the entire agreement between you and Infoblox with respect to the Internship offer and supersedes all prior offers, negotiations and agreements, if any, whether written or oral, relating to such subject matter.

Anirudh Bathija

**307, Embassy Tranquil Apartments, Koramangala
Bangalore, Karnataka 560034**

Dear **Anirudh**,

I'm delighted to offer you a role at Cisco, where you'll be joining 70,000+ people who change the way the world works, lives, plays, and learns! But our edge doesn't come from our world-changing technology, it comes from our people. People just like you.

If you decide to join us, we offer something exceptional – it's called Our People Deal. It is all about what Cisco will offer you, and what we ask of you in return. Below you'll find the beginning of what Cisco has for you.

We're offering you a position as a **Software Engineer**, Grade Level **004** in **123 - Cisco Systems (India) Private Limited**. You'll report to me, **Murali Kannan** |murkanna@cisco.com and you'll start in our **Bangalore, India** office.

When you'll start ?

We're planning for you to start on **11-Aug-2021** (Start Date). If this date won't work for you, please email me (**Murali Kannan** |murkanna@cisco.com) with the date you prefer and we can discuss options. You just need to make sure it is at least two weeks after we receive all your signed documents.

What Happens Next ?

Please let us know your response to this offer by **21-May-2021** by either accepting this offer or contacting your recruiter or me to discuss.

If you accept the offer, you'll get access to our hiring portal, "My Documents Space" where you'll find more about what you need to get started on your Cisco career journey.

Get in touch if you have any questions. Reach out to me personally, or your recruiter, who is also a great source of information. It's been a pleasure getting to know you, **Anirudh**. I look forward to having you on our team!

Welcome to Cisco!

Dear Hruthwik,

We are pleased to offer you a short term services contract, hereinafter referred to as "Internship", commencing from January 04, 2021. Your Internship with athenahealth Technology Private Limited (the "Company") is subject to the following terms and conditions.

1. The Internship shall commence on January 04, 2021 and shall be valid until July 04, 2021 ("Internship Period") at Bangalore India. Thereafter the Internship automatically terminates without any action either from us or yourself.
2. During the Internship Period, you will be entitled to a stipend amount of **INR 30,000** per month (inclusive of Rs.1000 of lunch allowance), on a cost to Company basis.
3. As you shall be privy to the confidential Information of the Company, you shall sign a non-disclosure agreement ("NDA") with the Company which is enclosed with this letter of Internship. The Internship shall not commence until you sign such NDA.
4. During the Internship, you shall adhere to all rules and regulations which are applicable to all the employees of the Company, and you shall faithfully observe, comply and adhere to the same. The rules include the various company policies on hours of work, leave, process for handling assignments that are given to you from time to time, network usage, use of company materials and the like and these rules, regulations, instructions, policies, etc. will form an integral part of this letter of Internship. These policies may be modified by the Company from time to time.
5. You are obliged to take care of all company property given to you and return the same to the company either upon demand or upon the termination of the Internship.
6. The Company retains the right to terminate the Internship at any time before the expiry of the Internship Period either by giving you 30 (thirty) days' notice in writing or by way of 30 (thirty) days' salary in lieu of notice. In the event You desire to be relieved during the Internship Period, it will be necessary for you to give 30 (thirty) days' notice in writing or by way of 30 (thirty) days' salary in lieu of notice, unless a shorter notice period is determined by the Company.

Meghana Sharath

Letter of Engagement

Dear Meghana,

With reference to the interview you had with us, we are pleased to inform you that you have been selected as an **"Intern"** in our organization on the following terms and conditions.

*You agree that this internship will not in any way (i) be deemed or construed as an offer of employment from the Company, either during or post internship or, (ii) entitle you to any employment wages or benefits. **The Company may, at its sole discretion, extend an offer of employment to you based on your successful performance during your internship.** In such event, the Company reserves the right to change your location/reporting location. Your period of internship will not be taken into account for calculating any company or statutory benefits or generally for tenure of service.

Nature of Engagement:

You will be engaged as an **INTERN** for the duration of 6 months with effect from **4 January 2021** ("Internship Period").

Duration of Internship:

The duration of your internship will be for a period of **6 months** from the date of commencement of the training. Unless the Company extends the period of internship, in writing, solely at their discretion, your internship shall automatically stand terminated at the expiry of the Internship Period.

Stipend:

During the Internship Period, you will be paid a monthly consolidated stipend of **Rs. 22,000/- (Rupees Twenty-Two Thousand Only)** less any applicable taxes and withholdings in accordance with India tax laws. In addition, you will be entitled to Food Coupons of INR-1100/- Per Month

CERTIFICATE [Offer letter]

December 9, 2020

Raghavendra Raj
2/1 3rd floor 1st Cross Cubbonpet
Bangalore 560002

Dear Raghavendra,

We are pleased to offer you an Internship with Analog Devices India Private Limited (the "Company" or "ADI") for a period as stated below. The terms of your internship with Analog Devices are set out here below:

1. Your Internship with the Company starts on 1st Feb to 20th June 2021. You will be located in Bangalore
2. You will get a fixed monthly fee of INR 30,000 (Rupees Thirty thousand only). Your fees will be paid to you monthly in arrears and shall be paid net of applicable withholding taxes. Your fees is confidential information and should not be strictly discussed with anyone inside the Company.
3. Relocation: You are eligible for a one-time relocation amount of INR 25,000/- (subject to taxes). Relocation amount will be paid in your first month payroll
4. You will be eligible for a one-day paid time off per month, and a food allowance of INR 1700/- per month (subject to taxes). You will not be eligible for any other company benefits. This allowance is applicable only for the candidates onboarded onsite
5. Termination: Your Internship may be terminated by either party, by giving one (1) month notice in writing. The Company reserves the right to terminate your service at any time without notice should you be guilty of misdemeanor, misconduct, negligence or any breach of the terms and conditions of your internship. Please refer to Company policies on what amounts to misconduct.
6. Any discovery, invention, improvement, adaptation or variation of designs, drawings, processes, methods, material specifications, etc., which will be a result of your working in the Company or its associates, or which you may come to know in the course of your internship, more especially in relation to the engineering or technology used or adopted by the Company, shall be the property of the Company. You shall treat the above information or data about any work done in the Company in strict confidence. You shall not use, give or sell any of the information to any other person or firm for exploitation, for gain or otherwise. You will also assign to the Company, on a worldwide, perpetual and royalty free basis, any and all copyright, patent, and reproduction rights to any work done by you during your internship with the correspondence, etc., pertaining to the Company's business activities, commercial, technical or otherwise coming into your possession in the course of your internship shall be treated with strict confidence.
7. In the course of your internship with the Company, you may become aware of information related to the Company, the other employees of the Company, the customers of the Company and/ or any third party. You shall not disclose such information to any third party, unless such disclosure is in the normal course of your nature of work for the Company. You shall also be obliged to bring to the notice of the Company any such disclosure being made by any other person that you may become aware about. During or after your internship with us, you will not disclose any information pertaining to the affairs of the Company or its clients or about any of its product to any outside party. Such disclosure will be regarded as gross misconduct.

OFFER LETTER

Dear **Rahul**,

With reference to your application and subsequent discussions, we are pleased to offer you a 'Full Stack Engineer' position in our organization. The position will be based out of Bangalore, India.

Your employment is subject to a probationary period of six months beginning on your start date of 01 February 2021.

However, this period can be cut short or extended based on the individual's performance and at the sole discretion of the management.

Based on your performance you can be converted into a full-time employee.

Your pay during the probation period will be **INR 45,000** per month.

Your schedule will be approximately **45 hours per week** beginning 01 February 2021.

Please review, sign and return via email to confirm acceptance, no later than close of business on 09 December 2020.

Non Disclosure & Agreement to be signed on the date of joining.

We look forward to your long and prosperous career with Quikoo Technosoft Labs Private Ltd.

Yours sincerely,

SUBJECT: OFFER OF INTERNSHIP AT NEXTUPLE INDIA PVT LTD, BANGALORE

Dear Sagar P

On behalf of Nextuple India Private Limited, it is my pleasure to extend an offer to you for an internship position within our Product Engineering team.

This internship position is scheduled to begin **15th February 2021** and is approximately a six-month paid internship ending on 13th August 2021. In this role, you will report directly to **Parag Deskar**. The general working hours for this position is 40 hours per week, Monday to Friday.

During your temporary employment with Nextuple India Private Limited, you may have access to trade secrets and confidential or proprietary business information belonging to Nextuple India Pvt Ltd, its Parent company or the subsidiaries (together called 'Nextuple' or 'Company'). By accepting this offer, you acknowledge that this information must remain confidential and agree to refrain from using it for your own purposes or disclosing it to anyone outside of Nextuple. In addition, you agree that upon completion of your internship, you will promptly return any company-issued property and equipment along with information and documents belonging to Nextuple.

By accepting this offer, you acknowledge that you understand participation in this program is not an offer of employment. However successful completion of the program may result with an employment offer from Nextuple India Pvt Ltd, which will be decided by the company at the end of the internship period.

Your stipend during the internship program is **INR [REDACTED]** and the monthly payment is processed as per Nextuple India Pvt Ltd's payroll schedule.

Your internship at Nextuple India Pvt Ltd can be terminated by giving a one month notice by either party.

This offer letter represents the full extent of the internship offer and supersedes any prior conversations about the position. Changes to this agreement may only be made in writing. If you have any questions about this offer please contact humanresources@nextuple.com.

Please review this letter in full, and sign and return it via email to humanresources@nextuple.com with a copy to operations@nextuple.com to confirm your acceptance of the position no later than close of business on **11th December, 2020**. Please be sure to bring/share the following documents with you on your first day to complete your profile.

- 1) All Semesters grades/transcripts

To
Ms. Sahana
Mumbai

Dear Sahana,

Offer of Appointment as Intern-Software Engineering and Pre-Placement Offer

Further to your application and subsequent interview with us, we are pleased to make you an offer to join team Tata UniStore Ltd. (TUL) for the position Intern-Software Engineering in Engineering Team for the period 02-Jan-2021 to 30-June-2021

While you make this decision to join us, I am sure you are excited to know more about us and the culture at TUL.

- We obsess over customer delight
- We treat our brands as symbiotic partners and key stakeholders
- We will never compromise trust in pursuit of commercial advantage
- We will build a business that is meaningful for our stakeholders (customers, brands and shareholders) and makes long term economic sense
- We care about people and emotions as much as business and outcomes

This year, we aim to be the industry benchmark in the way we engage with our people. We believe in uncomfortable transparency and are happy to communicate the team engagement scores for the Manager and Department you will be joining.

Your Manager has a team engagement score of 4.2 out of 5 and this month's engagement score for your department is 4.2 out of 5.

We are confident that you will enhance this positive culture and help take the engagement scores to the next level.

During the period of internship, you will be paid a stipend on Rs. 25,000/- per month, subject to deduction of taxes as applicable.

On successful completion of your internship, you will be eligible for to join Tata UniStore limited as Software Engineer subject to fulfilment of conditions mentioned in the Pre-Placement Offer mentioned below

Kindly sign and return the duplicate copy of this letter in acceptance of these terms and conditions.

Yours Sincerely,

Behram R Sabawala

BMS College

Bangalore

Internship Offer Letter

Dear Rakshith,

Rakuten is pleased to offer you an educational internship opportunity as a "Technical Intern". You will report to Vivek J. This position is located in Bangalore. You will begin your internship with us on 22nd February, 2021 and will be expected to work 5 days a week. The expected end date of your internship is 30th July, 2021.

This letter is not a letter to offer employment but only an offer to Internship issued solely upon your request to enable you to complete your educational course. Further, please note that the stipend is paid to assist you in meeting the expenses of your education including college / tuition fees, purchase of books, subscriptions to portals with study materials, printing & stationery and such other expenses related to your education. The stipend amount is not in consideration of your services to Rakuten. Rakuten reserves its right to discontinue payment of stipend or the internship arrangement at any time with intimation to you.

You will be paid monthly stipend of including all applicable taxes if any. As an intern, you will receive benefits such as two meals served at company cafeteria, public transportation reimbursement (included in Stipend).

The Internship may be terminated at any time, either by you or Rakuten India without any reason by giving 30 calendar days' written notice or 30 days' stipend in lieu of the notice to the other party.

By accepting this offer, you agree that throughout your internship, you will observe all policies and practices governing the conduct of our business and employees.

I hope that your association with the Company will be successful and rewarding. Please indicate your acceptance of this offer by signing below and returning a copy of the same for Company records.

Sincerely,

For Rakuten India Enterprise Private Limited

Sub: Offer Letter for Employment in Quantiphi Analytics Solutions Private Limited ('Company')

Dear BS Prasanna,

We are pleased to offer you the position of **Intern - Framework Engineer** in Quantiphi Analytics Solutions Private Limited ("Quantiphi" or "Company") effective February 08, 2020 till August 07, 2021.

The offer details are as follows:

1. Onboarding: As part of the onboarding process, you will be required to undergo an internship program. Details regarding the same are as follows:

- a. **Details:**
 - i. Our flagship internship programme 'Virtuverse' is designed to provide you access to vast domain knowledge on Machine Learning, Big Data etc. via a virtual platform at your ease and comfort
 - ii. This program aims to be both challenging and rewarding, while keeping the current guidelines issued by the Ministry of Health
- b. **Duration:** The internship program is for a duration of **Six months**.
- c. **Performance Evaluation:**
 - i. During this internship period, your performance will be subject to continuous evaluation
 - ii. Post completion of your internship period, your absorption in the company as a full time employee shall either be confirmed or if your performance is found unsatisfactory, the internship shall be terminated, both of which shall be done by written intimation to you and which will be at the sole discretion of the Company.
- d. **Compensation:**
 - i. The remuneration of your internship during your tenure in the company on a cost-to-company basis shall be **Rs. 20,000 per month (Rupees Twenty Thousand per month)**
 - ii. Over and above the monthly stipend, you shall also be entitled to a one time set up cost of Rs. 2000/- in order to enable you to be infrastructure ready for the virtual training
 - iii. You will be eligible for internet reimbursement of Rs. 600/- per month for your internship period.

2. Quantiphi- Corporate Development Program (Q-CDP):

- a. **Details:** This program is designed to provide you with projects and learning opportunities that will be both challenging and rewarding
- b. **Eligibility:** Once you have completed the 6 month internship and if your performance is found to be satisfactory, you will be eligible to join us as a full time employee and will be a part of the program. The decision on the same is on the sole discretion of the Company
- c. **Duration:** Q-CDP program is for a duration of three years
- d. **Performance Evaluation:** During your tenure with Quantiphi, your performance will be subject to continuous evaluation

Dear Chinmayi,

I'm delighted to offer you a role at Cisco, where you'll be joining 70,000+ people who change the way the world works, lives, plays, and learns! But our edge doesn't come from our world-changing technology, it comes from our people. People just like you.

If you decide to join us, we offer something exceptional – it's called Our People Deal. It is all about what Cisco will offer you, and what we ask of you in return. Below you'll find the beginning of what Cisco has for you. We're offering you a position as a COLLEGE INTERN, Grade Level 099 in 123 - Cisco Systems (India) Private Limited. You'll report to me, Sabina Balachandran - sabbalac@cisco.com and you'll start in our NA.BANGALORE.KARNATAKA.INDIA.NON-REMOTE office.

We're planning for you to start on 10-Feb-2021 (Start Date). If this date won't work for you, please email me (Sabina Balachandran - sabbalac@cisco.com) with the date you prefer and we can discuss options. You just need to make sure it is at least two weeks after we received all your signed documents.

I take this opportunity to congratulate you on your appointment and welcome you to our company.

Please return a signed copy of this letter to indicate your acceptance of this Internship offer letter, its terms and conditions as listed above and the attached agreements.

Yours sincerely,

For 123 - Cisco Systems (India) Private Limited

Strictly Personal & Confidential

Subject: Appointment as Trainee Intern - UNBXD Internship Program

Dear Karthik,

With reference to our recent discussions, we are pleased to offer you an opportunity to undertake the assignment as **"Intern – Relevance (Engineering)"** with UNBXD Software Private Limited, under the following terms and conditions:

1. Your **internship** with the Company shall commence with effect from **19th January 2021**. The duration of the internship shall be for a period of **Three Months** extendable based on business need.
2. **Compensation as Trainee:** You will be paid a monthly Stipend of **Rs.15,000 (Rupees Fifteen Thousand Only)** for providing your services for the required duration on all working days as defined by the company. Your internship stipend is purely a matter between yourself and the Company and has been arrived on the basis of your specific background, professional merit and the services that you will be providing to the Company. If you fail to provide services in any day of the month, for the duration as defined by the Company, your compensation will be reduced accordingly. Your emolument will be payable in one single installment at the end of each month pursuant to the Company's policy subject to withholding Tax and other normal deductions.
3. You agree to the best of your ability and experience that you will at all times loyally and conscientiously perform all of the duties and obligations required of and from you pursuant to the express and implicit terms hereof, and to the reasonable satisfaction of the Company. During the term of your internship, you further agree that you will devote all of your business time and attention to the business of the Company, the Company will be entitled to all of the benefits and profits arising from or incident to all such work services and advice, you will not render commercial or professional services of any nature to any person or organization, whether or not for compensation, without the prior written consent of the Management and you will not directly or indirectly engage or participate in any business that is competitive in any manner with the business of the Company.
4. **Independent Service Provider:** You shall perform all services hereunder as an independent Services Provider on a non-exclusive basis and nothing contained herein shall be deemed to create any association, partnership, joint venture or relationship of employer and employee.
5. **Confidentiality and Secrecy:** All tangible and intangible information obtained, developed or disclosed in connection with the performance of service under this Agreement or otherwise will be considered to be confidential and proprietary information (Confidential Information)

UNISYS INDIA CLOUD 20/20

Project: **Social Media Analytics**

Team members: **Drushya C K and Monica Basavaraju**

College: **BMS College of Engineering**

Unisys delivers secure digital solutions to businesses and governments.

Unisys is built on over 145 years of game-changing innovation. This company has evolved and adapted over time, but their passion for innovation and for helping the clients succeed has remained constant. The company's Mission is to build high-performance, security-centric solutions for the most demanding businesses and governments, and the track record of success is second to none. Their solutions consistently deliver the significant, measurable results that matter most to the clients. The company works on building security into the solutions themselves.

Unisys Cloud 20/20 is one of India's biggest online technical project contests which aims to provide engineering students across the country with a platform to offer innovative ideas around disruptive technology trends. Students should submit project ideas in broad technical areas as per the contest guidelines. These ideas will be evaluated by the Unisys Technical team.

We had a great learning experience in Unisys company by working on Social Media Analytics project mentored by Ravi Kumar Rao sir, an employee at Unisys. We have had a good experience of getting to know of industry culture by visiting the industry, Unisys India Pvt. Ltd - IT/BT Park, KSIIDC, South Block, 5th & 6th Floor, Plot No 1,2,3&4, Rajajinagar, Industrial Estate, Bangalore- 560010, Karnataka, and presenting the demo of our project to our mentor. We learnt how to work on projects with deadlines and milestones marked at each level and to pitch in ideas spontaneously to keep improvising the scope of our project, with Ravi sir's guidance and support. We worked hard to bring out the best in the project to meet the requirements of the problem statement given to us. It was a pleasure for both of us to have been a part of this wonderful journey of Unisys India Cloud 20/20.

ENGAGEMENT LETTER

Dear **Naveen**,

Kindly refer to our discussions in relation to your internship appointment in our Company

COMMENCEMENT OF CONTRACT:

You will join the services of the Company as an "**Intern**" from **04 January 2021**.

TERMS OF CONTRACT:

You shall faithfully and to the best of your ability devote all of your working time exclusively to the performance of the services as may be assigned to you by the Company. You hereby agree to abide by all policies and decisions of the Company during the term of this Agreement.

COMPENSATION AND OTHER BENEFITS:

As compensation for services mentioned hereunder, the Company will pay you **40000 (Rupees Forty Thousand Only)** per month. Your compensation will be payable in accordance with the Company's accounts payable policy. All forms of payments referred to in this letter are subject to such deductions as may be prescribed by any Act/Rules/Notifications as applicable to you or as amended from time to time.

Further, your job title, duties and stipend may be adjusted from time to time as may be determined by the Company at its sole discretion.

PRINCIPAL OFFICE:

You will currently perform your duties primarily at the Company's office in **Bangalore** or in such location as the Management may determine from time to time. You may be required to travel from time to time in the performance of your duties. In this regard, you are allowed to incur reasonable expenses towards tickets and other conveyance, food and lodging, which shall be reimbursed by the Company on actual basis. In this regard whether expenses incurred is "reasonable" or not shall be decided by the Management at its sole discretion.

TRANSFERABILITY:

During your contract with the Company, the Management will be within its rights to transfer you for your work or loan services to any other unit/division/department of the Company without any change in the terms and conditions of the contract at the sole discretion of Management.

May 28, 2020

Dear Pravalikha C,

Mokxa Technologies, LLC ("Mokxa" or "Company") is pleased to offer you an Internship or Training ("Internship") in Software development. Your Internship begins effective **Jun 3, 2020**. This Internship will require a minimum of 25 hours per week for a minimum of two months or as agreed from time to time. Please be advised that this Internship is offered to you free of cost and will not involve any compensation to you as well. This is also not an offer of employment. This is purely a learning opportunity. This internship will be administered remotely. By signing this letter you attest that you have a computer and access to high speed internet, which are pre-requisites to take advantage of this training.

During this time, you will be assigned a mentor and you will be reporting to and be working under the supervision of your mentor. The mentor will be in touch with you for the next steps upon your acceptance of this offer.

Confidentiality of Information During your internship: you may become aware of information relating to the business of Mokxa Technologies, LLC, including but not limited to client lists, trade secrets, and client details and pricing structures. Confidential information, including client lists, trade secrets, pricing structures and any and all documents created by you in the course of your Internship remain the sole property of Mokxa Technologies, LLC. You shall not, either during or after your Internship, without the prior consent of the Mokxa Technologies LLC, directly or indirectly divulge to any person or use the confidential information for your own or another's benefit.

We are looking forward to having you at our company and hope you will have an enriching experience. To accept this offer, please sign below this and return a copy at your earliest to pjain@mokxa.com.

Sincerely,

Dear Adithi,

INTERNSHIP AGREEMENT

As part of the course curriculum in pursuance of your degree at your College, you had represented that you are required to complete a project assignment with EMC SW & Serv I Pvt Ltd (Dell or "the Company").

You have approached to do the said Project with Dell and Dell is pleased to offer you an Internship with effect from 22 June 2020 to 18 June 2021. You shall take up the said Project with EMC Department (Vinitha Manoharan (1019827)) in Bangalore, India.

The Terms and conditions of your Internship shall be as follows:

- a) You will be assigned a Project Guide during your internship with Dell. The details about your project will be provided to you upon you joining the Internship with Dell. You are expected to apply your best degree of professional, technical and administrative skills and experience, work diligently and evidence care and economy in the use of office equipment and supplies. Your progress will be reviewed from time to time by your Project Guide.
 - b) The deliverables of your Project shall be as detailed in Annexure to this Agreement.
 - c) You will be paid a consolidated monthly stipend of **Rs 25,000.00** (the "**Stipend**") during your internship at Dell. Statutory withholdings and taxes as applicable shall be deducted from your monthly Stipend. You will not be entitled to any of the other Benefits assigned to employees of Dell.
- Code of Conduct:** Dell looks forward to the application of the best of your skills and experience, during your Internship with Dell. In addition, at all time during your Internship with Dell, you shall comply with Dell's Code of Conduct that has been attached in this mail, as applicable from time to time.
- e) **Confidentiality Obligation:** You will not use, publish, misappropriate or disclose any "Confidential or Proprietary Information", during or after your internship, except as authorized / approved in writing by Dell. Such Information shall include what you learn or originate during your Internship, which is not available or readily ascertainable from public sources, and includes such information disclosed by others in confidence to Dell. If in doubt, you will promptly consult your Project Guide at Dell. Confidential and Proprietary Information includes, but is not necessarily limited to, the information described in subparagraphs below.
 - i. Computer products, Dell's processes and device strategies planned or under development, including device specifications, system architecture, logic designs, circuit implementations and plans for unannounced and announced products;

PHILIPS

14 August 2020
Ms. Arpitha Hegde

Dear Arpitha,

Subject: Engagement as an Intern in Philips India Limited

We have the pleasure to offer you a Internship with Philips India Limited Philips as per the following terms of reference:

Terms and Conditions:

1. Your project duration will be from 01 September 2020 to 16 July 2021.

India

Dear Jamuna

Intel Internship

Congratulations! Intel is pleased to offer you an Intern position as a part of our internship program.

At Intel we are committed to providing a supportive environment to learn and grow; as such we hope you will find your internship enjoyable and rewarding.

This letter and its enclosures are really important as it contains all the information about your internship and, in particular, the terms and conditions of your internship, so please do read it very carefully.

Right to Work

Please note, if relevant, this offer of internship is made subject to the local immigration approving your Work Permit/Visa authorization for internship with Intel, if you are a foreign national or a non-permanent resident of India rules and regulations of the approved visa, and the issue of a US government export license (if required).

Internship

Your internship will take place at BGA1 - BGA1 - Airport 1 Bangalore with effect from 15 June 2020 to 14 May 2021. In the event that your actual start date is different to the above, the date recorded in Intel's HR System shall be regarded as final.

Your internship will be in the DLO India Office department

You will not have any fixed hours of work but we would ask you to attend working hours/shift schedule as proposed to you by your supervisor in order to gain the best experiences and learning from your internship.
